**Bill Summary**

*(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://leg.colorado.gov>.)*

The bill requires a person with an intellectual and developmental disability (person) to receive counseling on the long-term impacts of sterilization and the less intrusive means available to prevent pregnancy before the person consents to sterilization. The counseling must take place regardless of whether the person is deemed competent to give consent.

Shading denotes HOUSE amendment. Double underlining denotes SENATE amendment.  
Capital letters or bold & italic numbers indicate new material to be added to existing law.  
Dashes through the words or numbers indicate deletions from existing law.

The bill prohibits sterilization against the person's will, regardless of whether the person is deemed competent to consent, unless maintaining fertility or a pregnancy would pose an imminent threat to the life or health of the person.

The bill requires a petition for court-ordered sterilization to include a statement that the person has received counseling on the long-term impacts of sterilization and the less intrusive means available to prevent pregnancy.

If a person expresses a desire to the court to maintain fertility and does not want to undergo sterilization, the bill prohibits a court from ordering sterilization unless sterilization is necessary to preserve the life or health of the person.
