The bill requires the secretary of state to refer a ballot issue at the November 2026 general election to seek voter approval for the state to retain and spend an amount of state revenue equal to the amount of state public K-12 education funding in excess of the limitation on state fiscal year spending and to increase state public K-12 education funding by up to 2% for 10 years.

The bill directs legislative council staff to determine the amount of state public K-12 education funding and describes how legislative council staff will make that determination.

The bill creates a positive factor to provide additional funding for each district. A positive factor is equal to the lesser of 2% of statewide total program funding for the 2026-27 budget year multiplied by a district's total program as a percentage of the statewide total program or the amount that the state is authorized to retain and spend that would otherwise have been in excess of the limitation on state fiscal year spending multiplied by a district's total program as a percentage of the statewide total program. A district may only use its positive factor funding for increasing teacher pay, improving teacher retention, lowering class sizes, and increasing access to career and technical courses.

The bill creates the excess state revenues account (account) within the general fund. The account consists of an amount of money equal to the amount of state revenues in excess of the excess state revenues cap that the state retains for a given fiscal year pursuant to voter approval of the bill. Money in the account must first be spent for paying districts their positive factor and only after that may be spent for any other purpose.

The bill directs the state auditor to conduct and publish, for each state fiscal year that the state retains and spends state revenues in excess of the limitation on state fiscal year spending, a legislative report. That report must include descriptions of:

- The amount of state revenues that the state retained and spent that would otherwise have been in excess of the limitation on state fiscal year spending; and
- How the state revenues that the state retained and spent that would otherwise have been in excess of the limitation on state fiscal year spending were expended.

Lastly, the bill makes conforming amendments to ensure that voter approval of the bill does not impact the expanded earned income tax credit, the family affordability tax credit, or the affordable housing financing fund.

1 **SECTION 1. Legislative declaration.** (1) The general assembly
2 finds and declares that:

3 (a) Public education is the bedrock of Colorado's democracy,
4 fundamental to individual opportunity, the underpinning of thriving
5 communities, and the key to Colorado's economic prosperity and future;

6 (b) Wise and adequate investment in Colorado's schools is
7 essential to maintaining and improving the competitiveness of Colorado
8 and its students;

9 (c) The money invested in Colorado's public schools has a return
10 on investment that has long been recognized as among the nation's
11 highest;

12 (d) An increase in the rates of K-12 graduation, the earning of
13 industry certifications, and the earning of associates degrees demonstrate
14 the effectiveness of Colorado's investment in public schools;

15 (e) Research demonstrates that increasing school funding results
16 in long-term increases in graduation rates and lifetime wages, prevents
17 crime, and lowers incarceration rates;

18 (f) Educators and support staff in every school district and charter
19 school across Colorado make invaluable contributions to their schools,
20 districts, and communities by dedicating their time, talents, and
21 out-of-pocket money to their students, despite Colorado ranking near the
22 bottom of starting teacher pay and having the largest teacher pay penalty
23 in the nation;

24 (g) Teachers, counselors, para professionals, bus drivers, and
25 essential support staff are leaving their professions because salaries
26 haven't kept up with housing, healthcare, and cost of living;

27 (h) Students are learning in overcrowded classrooms and in

1 schools with fewer mental health counselors, opportunities for special
2 education support, and programs that support their ability to develop into
3 healthy, productive adults;

4 (i) Working class, multilingual, and rural communities are hit
5 hardest by chronic school underfunding;

6 (j) In January 2025, the legislature received the reports and
7 recommendation of the two commissioned adequacy studies: "Equity and
8 Adequacy of Colorado School Funding - A Cost-Modeling Approach",
9 by the American institutes for research, and "Colorado Input-Based
10 Financial Adequacy Study Report", by Augenblick, Palaich and
11 Associates, Inc;

12 (k) The adequacy studies found that, were Colorado schools
13 funded fully and fairly, every student would have the individual attention
14 they need from teachers, counselors, health professionals, tutors, and
15 support staff to succeed and thrive; every teacher would have a
16 reasonable workload, professional development and coaching, and a
17 salary that would allow them to live where they work; and every
18 community would enjoy the benefit of vibrant public schools, a
19 high-quality workforce, and an engaged citizenry;

20 (l) Colorado's fiscal constraints and potential of federal funding
21 cuts to education, medicaid, nutrition, human services, and other critical
22 programs threaten the sustainability and adequacy of school funding in
23 Colorado and to deplete the state education fund; and

24 (m) Therefore, it is in the best interest of educators, students, and
25 their families to allow voters to invest further in public education by
26 modernizing the state's ability to retain and spend revenue to meet the
27 needs of Colorado communities and to ensure that state investment in

1 K-12 public education is increased by two percent for at least ten years
2 through the funding of a positive factor.

3 **SECTION 2. In Colorado Revised Statutes, 22-54-103.3, amend**
