

AMPLIFY Act: Digital Harm Remediation, Addictive Design, Credit, Screening, and Sensitive Data

Legislating Drafter Working Package — 33-bill modular AMPLIFY build

Legislating drafter file. This chapter draft is designed to stand on its own and to support modular insertion into broader AMPLIFY stacks.

Bill 33. AMPLIFY Act: Digital Harm Remediation, Addictive Design, Credit, Screening, and Sensitive Data

Single subject. Remediation funding and substantive settlement tracks for addictive design, minors, credit misuse, automated screening, consequential automated decisions, and sensitive-data exploitation.

Purpose. Carry the main settlement specializations in one compressed chapter for the 33-bill build.

Draft structure

Section	Core draft direction
1. Short title	This act shall be known and may be cited as the “AMPLIFY Act: Digital Harm Remediation, Addictive Design, Credit, Screening, and Sensitive Data”.
2. Legislative declaration	The general assembly finds and declares that carry the main settlement specializations in one compressed chapter for the 33-bill build.
3. Definitions	Definitions should be alphabetized, lowercase, and drafted in singular form unless a term of art requires otherwise.
4. Operative sections	Substantive rights, duties, approvals, or restrictions listed below.
5. Administration	Rulemaking, designation of administering authority, records, notices, and implementation mechanics.
6. Construction	Independent operation, severability, no implied repeal, and other necessary construction clauses.
7. Effective date	Effective date and any conditional clause required by filing strategy.

Draft definitions

addictive design. a design feature or workflow materially associated with compulsive engagement or manipulative retention as identified by law or rule.

consequential automated decision. an automated or substantially automated decision materially affecting housing, work, credit, insurance, education, benefits, legal access, or similar interests.

sensitive data. precise geolocation, biometric, health-related, financial, intimate, or other data identified by law or rule as highly sensitive.

Draft operative provisions

Section 4. Remediation fund

- A remediation fund may receive and administer money lawfully obtained through digital-harm settlements, judgments, or related allocations authorized by law.
- The fund may maintain subaccounts by harm category or remedial purpose.

Section 5. Specialized harm tracks

- A settlement or remedial program authorized by law may address addictive design, minor safety, consumer credit misuse, screening and eligibility harms, consequential automated decisions, and sensitive-data exploitation.
- Such terms may include audits, deletion obligations, explanation standards, fast-response rules for minors, human review rights, and category-specific restrictions.

Section 6. Recipient and program administration

- Money lawfully available for direct remediation or public-interest support may be allocated according to rules, agreements, or orders consistent with this act and other governing law.

Required construction clauses

- Independent operation. This act operates independently and remains effective whether or not any related measure or companion act is adopted.
- Severability. If any provision of this act or its application is held invalid, the invalidity does not affect other provisions or applications that can be given effect without the invalid provision or application.
- Single-subject construction. This act shall be construed to embrace only the single subject described in its title and no separate subject shall be inferred from a remedy, definition, recordkeeping duty, funding mechanism, or construction clause that is necessarily and properly connected to that subject.
- Retrospectivity savings clause. This act shall not be construed to create a new punitive retrospective law and shall be interpreted, to the extent possible, as prospective, transitional, remedial, or settlement-based.
- Revenue and fee construction. Any money authorized by this act shall be construed and administered only in the manner and to the extent permitted by applicable constitutional and statutory limitations.

Annex and Effective-Date Integration

Annex incorporation

Annex A to this measure contains enumerated harm-category schedules, remedial protocol tables, and category-specific reporting templates.

The annex may classify and structure enumerated harm categories but may not expand this measure into unrelated digital-policy lanes.

Effective date and implementation

This measure takes effect on the date declared by law following approval; except that category-specific reporting systems and optional category programming may phase in under the implementation schedule.

Core remediation, urgent corrective routing, and hidden-data remediation rules take effect with the measure.
