Under current law, the chief information officer (officer) publishes information about state revenues and expenditures in a web-based system, which is known as the transparency online project (TOP). The bill requires the officer to include county revenue and expenditure data in the TOP.

Shading denotes HOUSE amendment. Double underlining denotes SENATE amendment.  
*Capital letters indicate new material to be added to existing statute.*  
*Dashes through the words indicate deletions from existing statute.*

HOUSE  
Amended 2nd Reading  
March 16, 2016

No later than 30 days after the end of its fiscal year, a county is required to provide the officer with a database that:

- ! Identifies all revenue received by the county;
- ! Identifies all expenditures made by county agencies; and
- ! Is in an electronic format approved the officer.

This information should not include any information that is not a public record or that is confidential. The officer is required to separately include the most recent revenue and expenditure data for each county in the TOP and to archive past county information. In some instances, the officer may aggregate a county's data.

If a county fails to provide the required database to the officer for more than 90 days after the deadline, then the executive director of the department of local affairs shall consider the county's lack of transparency as an adverse factor when making grants from the local government severance tax fund.
