BILL TOPIC: RACE INFO ID APPLICATION

Fiscal Impact Summary	FY 2016-2017	FY 2017-2018
State Revenue		
State Expenditures	Minimal workload increase.	
Appropriation Required: None.		
Future Year Impacts: None.		

Summary of Legislation

This bill, *as amended by the House Judiciary Committee*, requires the Division of Motor Vehicles (DMV) in the Department of Revenue (DOR) to modify the application process for drivers' licenses and state-issued identification cards. Revised applications for these documents must include the opportunity for an applicant to self-identify his or her race or ethnicity. If an applicant chooses to report his or her race or ethnicity information, the information must not be printed on the card; rather, this information must be maintained in the stored information on the card's magnetic strip.

Background

Under current law, the DMV collects approximately 15 specified pieces of data from individuals applying for driver's licenses, instruction permits, and identification cards. The DMV also collects approximately five additional pieces of personal data on a voluntary basis, such as emergency contact information or an applicant's willingness to be an organ donor. Certain information is required to be printed on the license, permit, or identification card, and other information is stored in the division's driver's license system (DLS), which is available immediately to any law enforcement agency equipped with magnetic card readers.

DRIVES. The DMV has a capital project currently underway to replace both the state's Driver's License System (DLS) and the Colorado State Titling and Registration System (CSTARS) with an updated system known as the Driver License, Record, Identification and Vehicle Enterprise Solution (DRIVES). The DRIVES system is expected to be fully operational in August 2018, with the driver's license portion that replaces the DLS functionality scheduled to come online March 2017, followed by the portion that replaces the CSTARS functionality.

State Expenditures

The DOR will include the computer programming required under the bill in the DRIVES project.

Effective Date

The bill takes effect upon signature of the Governor, or upon becoming law without his signature. It applies to driver's licenses and state identification card applications made on or after March 1, 2017.
