Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at http://leg.colorado.gov/.)

Opioid and Other Substance Use Disorders Interim Study Committee. The bill requires all individual and group health benefit plans to provide coverage without prior authorization for a five-day supply of buprenorphine for a first request within a 12-month period.

Additionally, all individual and group health benefit plans that cover physical therapy, acupuncture, or chiropractic services shall not...
subject those services to dollar limits, deductibles, copayments, or coinsurance provisions that are less favorable than those applicable to primary care services under the plan if the covered person has a diagnosis of chronic pain and has or has had a substance use disorder diagnosis.

The bill prohibits carriers from taking adverse action against a provider or from providing financial incentives or disincentives to a provider based solely on a patient satisfaction survey relating to the patient's satisfaction with pain treatment.

The bill clarifies that an "urgent prior authorization request" to a carrier includes a request for authorization of medication-assisted treatment for substance use disorders.

The bill permits a pharmacist who has entered into a collaborative pharmacy practice agreement with one or more physicians to administer injectable medication-assisted treatment for substance use disorders and receive an enhanced dispensing fee for the administration.

The bill prohibits carriers from requiring a covered person to undergo step therapy using a prescription drug or drugs that include an opioid before covering a non-opioid prescription drug recommended by the covered person's provider.

The bill requires the Colorado medical assistance program to authorize reimbursement for a ready-to-use version of intranasal naloxone hydrochloride without prior authorization.

The bill prohibits the requirement that a recipient of medical assistance undergo a step-therapy protocol using a prescription drug containing an opioid prior to authorizing reimbursement for a non-opioid prescription drug recommended by the person's health care provider.

The bill permits a pharmacist who has entered into a collaborative pharmacy practice agreement with one or more physicians to administer injectable medication-assisted treatment for substance use disorders and receive an enhanced dispensing fee under the Colorado medical assistance program for the administration.

The bill requires the department of health care policy and financing and the office of behavioral health in the department of human services to establish rules that standardize utilization management authority timelines for the non-pharmaceutical components of medication-assisted treatment for substance use disorders.
