Capital Development Committee. The bill authorizes private entities to use the state telecommunications network through public-private partnerships considered, evaluated, and accepted by the chief information officer and relocates laws related to the state telecommunications network from the department of public safety's statutes to the statutes regarding telecommunications coordination within state government. The bill also specifies that any lease revenues from public-private partnerships must be credited 75% to the public safety communications trust fund for improvements to the state telecommunications network and 25% to the public school capital construction assistance fund for technology grants.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 hereby finds and declares that:

4 (a) By almost any measure, the thousands of public safety
5 communications networks in the United States today are inadequate;

6 (b) The most discussed problem is the lack of interoperability,
7 which means that in many places emergency workers such as police and
8 firefighters have incompatible communications systems that prevent them
9 from interacting with one another;

10 (c) Current public safety infrastructure is also unnecessarily
11 expensive because all these independent and overlapping networks
12 require an order of magnitude more towers than would otherwise be
13 needed; and

14 (d) There is an opportunity to approach these problems by
15 considering public-private partnerships, which the general assembly
16 encourages the department of public safety to study and contemplate.

17 **SECTION 2.** In Colorado Revised Statutes, **amend with**
18 **amended and relocated provisions** 24-37.5-501 as follows:

1 **24-37.5-501. Powers, duties, and functions concerning**
