to a criminal history record check or provide evidence of submitting to a criminal history record check at the time of hire as a pharmacy technician. If an applicant is not certified by a national certifying organization at the time of application for state certification, the board may grant a provisional certification to the applicant to allow the applicant up to 18 months or, if granted a hardship extension, an additional period determined by the board, to obtain national certification. A provisional certification is not renewable, and if the provisional certificant fails to obtain the national certification within the 18-month period or extended period granted by the board, the provisional certification expires and the person cannot practice as a pharmacy technician until the person satisfies all requirements for certification by the board.

To renew a certification, in addition to board requirements for renewal, a pharmacy technician must satisfy renewal and continuing education requirements of the national accrediting organization that certified the pharmacy technician.

Similar to pharmacists and interns, a pharmacy technician certified by the board is subject to the jurisdiction of the board and to discipline by the board for engaging in unprofessional conduct.

The bill maintains the limitation on the number of interns and pharmacy technicians that a pharmacist may supervise but specifies that if the pharmacist is supervising 3 or more pharmacy technicians, a majority of the pharmacy technicians must be certified.

The bill replaces one nonpharmacist member of the board with a certified pharmacy technician member with 5 years of pharmacy technician experience.

The regulation of pharmacy technicians by the board is subject to the same sunset review that applies to the board and its functions in regulating the practice of pharmacy.
