Current Appropriations Clause in Bill

The bill neither requires nor contains an appropriation clause for FY 2020-21.

Points to Consider*General Fund Impact*

The Joint Budget Committee has proposed a budget package for FY 2020-21 based on the following:

- the May 12, 2020, Office of State Planning and Budgeting revenue forecast;
- a school finance bill placeholder for a reduction of \$723.8 million General Fund;
- a placeholder for the reduction of \$202.0 million General Fund through one or more non-JBC package bills; and
- an adjusted statutory General Fund reserve percentage of 3.84 percent equal to \$402.0 million.

This bill is anticipated to decrease diversions from the General Fund by \$15.0 million in FY 2019-20 and \$40.0 million in FY 2020-21. The net General Fund savings of \$55.0 million over the two years will increase the excess General Fund reserve or decrease the proposed placeholder reductions by the same amount.

Legislative Authority

Is it necessary to "continuously appropriate" money in the Health Insurance Affordability Cash Fund? This method of funding essentially moves related expenditures off-budget, and thus expenditures are not reported or accounted for through the budget process.

For example, the bill allows the Health Insurance Affordability Enterprise to spend up to three percent of the annual revenue to the Health Insurance Affordability Cash Fund on administration. This amounts to a projected \$3.1 million in FY 20-21 and grows to a projected \$4.5 million by FY 22-23. The Division of Insurance is currently appropriated approximately \$1.1 million annually for administration of the reinsurance program. The Appropriations Committee may want to consider making the expenditures for administration subject to annual appropriation by the General Assembly.

Additional Background

The bill includes a cascading ("waterfall") allocation of the revenue to the Health Insurance Affordability Cash Fund that is not detailed in the Legislative Council Staff Revised Fiscal Note dated 06/05/2020. The allocation is different in year 1, year 2, and then year 3 and beyond. The table below summarizes the statutory allowable allocations and the estimated expenditures, provided by the Division of Insurance, within the allowable allocations.
