currently required to be covered by health insurance carriers pursuant to the federal "Patient Protection and Affordable Care Act" and adds them to the current list of services required to be covered by Colorado health insurance carriers, which services are not subject to policy deductibles, copayments, or coinsurance. The bill expands certain preventive health care services to include osteoporosis screening; urinary incontinence screening; and counseling, prevention, screening, and treatment of a sexually transmitted infection (STI).

Current law requires a health care provider or facility to perform a diagnostic exam for an STI and subsequently treat the STI at the request of a minor patient. The bill allows a health care provider to administer, dispense, or prescribe preventive measures or medications where applicable. The consent of a parent is not a prerequisite for a minor to receive preventive care, but a health care provider shall counsel the minor on the importance of bringing the minor's parent or legal guardian into the minor's confidence regarding the services.

Current law requires the executive director of the department of health care policy and financing to authorize reimbursement for medical or diagnostic services provided by a certified family planning clinic. The bill removes the requirement that services be provided by a certified family planning clinic and authorizes reimbursement for family planning services and family-planning-related services provided by any licensed health care provider.
