**Sections 1 and 3** of the bill exempt certain mapping data submitted to the office of information technology (office) from public disclosure under the "Colorado Open Records Act".

**Section 2** adds a definition of "critically unserved", which means a household or area that lies outside municipal boundaries and lacks access to at least one provider of nonsatellite broadband service delivered at measurable speeds of at least 10 megabits per second downstream and one megabit per second upstream, and a definition of "office of information technology".

Section 3 reduces the membership of the broadband deployment board (board) in the department of regulatory agencies from 16 members to 11 members.

The board is required to develop a request for proposal process through which the board will solicit bids for proposed projects to serve areas of the state that the office has determined lack access to broadband service at measurable speeds of at least 10 megabits per second downstream and one megabit per second upstream. The board is required to reserve at least 75% of the money from the high cost support mechanism that is allocated for broadband deployment to award grants to proposed projects solicited through the request for proposal process.

Section 3 also directs the board to:

- Require an applicant or appellant to submit a speed test performed on an incumbent provider's network and conducted in accordance with industry-standard speed-test protocols;
- Give additional consideration to proposed projects that would give discounted service for low-income households;
- Contractually require an applicant receiving a grant award to:
  - Report annually on the number of homes and businesses served by the grant-supported broadband network, the number of homes and businesses expected to be served in the following year, and the speeds, rates, and services offered to customers through the grant-supported broadband network; and
  - Provide third-party certification, after the grant money has been fully expended, that the project meets the original design of, and provides the measurable speeds, rates, and services set forth in,

the application.

- Require an applicant or appellant to submit to the office, in a form and manner determined by the office, certain granular mapping data.

**Section 4** repeals the current board composition requirements on August 31, 2021.

20 CRITICALLY UNSERVED AREAS IDENTIFIED BY THE OFFICE, INCLUDING ANY  
21 CRITICALLY UNSERVED AREAS WITHIN THE BOUNDARIES OF AN INDIAN  
22 RESERVATION LOCATED WITHIN THE STATE.

10           issue of whether the area to be served is an unserved area.

11           (c) Denying funding for applications that overbuild areas  
12           receiving federal sources of high cost support or federal broadband grants  
13           for construction of a broadband network that will be completed within  
14           twenty-four months after the date that the applicant filed the application  
15           so as to maximize the total available state and federal support for rural  
16           broadband development. An incumbent broadband provider receiving  
17           federal funds must submit to the board an affidavit from a company  
18           officer that the build-out will be completed within the twenty-four-month

5 pursuant to this section, the commission may, by rule and in consultation  
6 with the board, establish requirements that comply with the FCC's
