The bill creates a scientific review council (council) to review the report and make recommendations to the general assembly. Based on the

research and findings, the Colorado school of public health shall produce a public education campaign for the general public, to be approved by the council, regarding the effect of high-potency THC marijuana on the developing brain and mental health.

Current law requires a doctor to conduct a full assessment of the patient's medical history when making a medical marijuana recommendation. The bill requires that assessment to include the patient's mental health history. If the recommending physician is not the patient's primary care physician, the bill directs the recommending physician to review the records of a diagnosing physician or licensed mental health provider. When a practitioner makes a medical marijuana authorization, the practitioner must certify that authorization to the department of public health and environment. The bill requires the certification to include:

- The date of issue and the effective date of the recommendation;
- The patient's name and address;
- The recommending physician's name, address, and federal drug enforcement agency number;
- The THC potency level of medical marijuana being recommended;
- The dosage form;
- The daily authorized quantity;
- Directions for use; and
- The recommending physician's signature.

The bill prohibits a physician for charging an additional fee for recommending an extended plant count or making a recommendation related to an exception to a medical marijuana requirement.

The bill imposes the following requirements on medical marijuana patients ages 18 to 20 years old:

- Two physicians from different medical practices have to diagnose the patient as having a debilitating or disabling medical condition after an in-person consultation;
- One of the physicians must explain the possible risks and benefits of the medical use of marijuana to the patient;
- One physician must provide the patient with the written documentation specifying that the patient has been diagnosed with a debilitating or disabling medical condition and the physician has concluded that the patient might benefit from the medical use of marijuana; and
- The patient attends follow-up appointments every 6 months after the initial visit with one of the physicians.

The bill requires the department of public health and environment (department) to create a report from emergency room and hospital discharge data of patients who presented with conditions or a diagnosis that reflect marijuana use and provide that report at the department's

annual "State Measurement for Accountable, Responsive, and Transparent (SMART) Government Act" hearing.

The bill requires the coroner in each case of a suicide, overdose death, or accidental death to order a toxicology screen. The coroner shall report the results of the toxicology screen to the Colorado violent death reporting system. The department then produces an annual report of the data beginning January 2, 2022, and annually each year thereafter.

The bill prohibits medical marijuana advertising that is specifically directed to those ages 18 to 20 years old and requires medical and retail marijuana concentrate advertising to include a warning regarding the risks of medical marijuana concentrate overconsumption.

A medical and retail marijuana store shall provide a notice at the time of sale regarding the criminal penalties associated with marijuana diversion. A medical marijuana store and retail marijuana store shall provide a patient with a pamphlet regarding the risks of overconsumption of medical marijuana concentrate when selling concentrate.

The bill requires medical marijuana stores to immediately record transactions in the seed-to-sale inventory tracking system to allow the system to:

- Continuously monitor entry of patient data to identify discrepancies with daily purchase limits and potency authorizations;
- Access and retrieve real-time sales data based on patient identification number; and
- Respond with a user error message if a sale to a patient or caregiver will exceed the patient's allowed purchase limit for that business day or potency authorization.

The bill limits the amount of medical marijuana concentrate that a patient can purchase in one day to 8 grams, unless the patient is 18 to 20 years old then the limit is 2 grams, except in the case of a homebound patient or if the patient's certification states that the patients needs more than 8 grams or 2 grams respectively.

Beginning January 1, 2023, the bill requires medical marijuana concentrate and retail marijuana concentrate to be sold in a package containing one gram separated into no less than 10 equal portioned amounts. The bill limits the amount of retail marijuana concentrate that a patient can purchase in one day to 8 grams.

1 *Be it enacted by the General Assembly of the State of Colorado:*
