"Over-snow use" is defined as travel on top of snow by human-powered or animal-powered means or by an off-highway vehicle that is primarily designed or altered for use over snow and runs without tires on a continuous belt track, with or without cleats, or on one or more skis while in use over snow. A local government may limit an over-snow use designation to human-powered or animal-powered travel, or both, only when necessary for the protection and safety of the public.
