The bill prohibits state and local public entities from:

- Denying, restricting, interfering with, or discriminating against an individual's fundamental right to use or refuse contraception or to continue a pregnancy and give birth or to have an abortion in the regulation or provision of benefits, services, information, or facilities; and
- Depriving, through prosecution, punishment, or other means, an individual of the individual's right to act or refrain from acting during the individual's own pregnancy based on the potential, actual, or perceived impact on the pregnancy, the pregnancy's outcomes, or on the pregnant individual's health.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds that:

4 (a) Access to abortion and reproductive health care is currently
5 under attack across the nation. Impending federal court cases, including
6 *Dobbs v. Jackson Women's Health Organization*, United States Supreme
7 Court Docket No. 19-1392, jeopardize access to legal abortion care for
8 tens of millions of people, particularly those living in most Southern and
9 Midwestern states.

10 (b) There are social, moral, and economic benefits when people
11 are able to decide whether and when to have children. Access to family
12 planning allows all Coloradans to pursue personal, educational, financial,
13 and familial goals and helps decrease the health and socioeconomic
14 disparities disproportionately faced by people of color and people with
15 low incomes.

16 (c) Access to reproductive health care is a matter of statewide
17 concern affecting the health and safety of Coloradans, including those
18 who live outside the Denver metropolitan area and the Front Range,
19 especially those residing in rural areas;

1 (d) Rural populations face limited access to primary care,
2 including abortion care and other family planning services, and often
3 navigate increased travel times when seeking health care. There are fewer
4 health-care providers in rural areas, and providers with rural mailing
5 addresses are significantly less likely to provide abortion care.

6 (e) Colorado has a strong history of supporting and protecting
7 access to reproductive health care, including for communities of color.
8 Colorado was the first state to decriminalize abortion care in an
9 overwhelmingly bipartisan effort in 1967, well before the Supreme Court
10 affirmed the right to abortion care nationwide in *Roe v. Wade*. Colorado
11 is a national model for access to family planning services, including
12 long-acting reversible contraceptives.

13 (f) Despite repeated rejections of attacks on abortion care by the
14 people of Colorado, there have been over 40 legislative attempts to
15 criminalize or outlaw abortion since 2010. Colorado voters have
16 demonstrated that they trust individuals to make their own ethical
17 decisions about abortion care based on what is best for their health and
18 their families.

19 (g) When individuals decide to have an abortion or use
20 contraception, it is critical that they get care on a timeline that works for
21 their health, with the support of providers whom they trust. Politically
22 motivated, medically inappropriate restrictions on health care have no
23 place in our statutes or our medical offices.

24 (2) Therefore, in order to modernize Colorado's statutes, the
25 general assembly affirms the fundamental right of individual Coloradans
26 to make their own reproductive health-care decisions.
