Currently, "United States Mountain Standard Time" (MST), defined in federal law as coordinated universal time minus 7 hours, is the standard time within Colorado. During the period of daylight saving time (i.e., the second Sunday in March to the first Sunday in November) time is advanced one hour. Federal law allows a state to stay on standard time

year round, but does not currently allow a state to adopt daylight saving time year round.

The bill makes daylight saving time, defined as coordinated universal time minus 6 hours, the year-round standard time within the state, but takes effect only if a federal law is enacted to allow states to remain on daylight saving time year round.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 hereby finds and declares that:

4 (a) The federal "Uniform Time Act of 1966" was enacted to
5 promote the observance of a uniform system of time throughout the
6 United States;

7 (b) The "Uniform Time Act of 1966" requires the standard time
8 in each time zone to be advanced by one hour beginning on the second
9 Sunday in March and ending on the first Sunday in November, commonly
10 known as daylight saving time;

11 (c) Under current federal law, states may exempt themselves from
12 observing daylight saving time, but are prohibited from enacting
13 year-round daylight saving time;

14 (d) Research shows that changing the clocks in accordance with
15 the "Uniform Time Act of 1966" has negative impacts on businesses,
16 individuals, and families;

17 (e) The decrease in workplace productivity resulting from
18 changing the clocks has a negative impact on the businesses of Colorado;

19 (f) The increase in heart attacks, strokes, and traffic accidents
20 resulting from changing the clocks has a negative impact on the health of
21 the residents of Colorado;

22 (g) The worsened sleep of the residents of Colorado, particularly

1 infants, resulting from changing the clocks has a negative impact on
2 individuals in Colorado and young families in particular;

3 (h) Changing the time, even if it is only by one hour, disrupts our
4 body clocks or circadian rhythm. For most people, the resulting tiredness
5 is simply an inconvenience. For some, however, the time change can have
6 more serious consequences to their health.

7 (i) The mental effects of changing time have been noted to
8 increase depression while the change also compromises sleep duration
9 and efficiency;

10 (j) Crime rates, including homicides, go down during daylight
11 saving time;

12 (k) Many people prefer daylight saving time to standard time
13 because it allows for more daylight hours in the evening when most
14 people are able to better utilize it for enjoying the outdoors, exercise,
15 shopping, and dining out;

16 (l) Eighteen states, including Colorado's neighboring states of
17 Utah and Wyoming, have already enacted laws to permanently stay on
18 daylight saving time year-round when federal law changes to allow states
19 to move to permanent daylight saving time; and

20 (m) Consequently, the residents and businesses of Colorado would
21 benefit from not changing the clocks and staying on daylight saving time
22 year round when federal law allows.

23 **SECTION 2.** In Colorado Revised Statutes, 2-4-109, **amend** (1)
