national standards and is replaced at least as frequently as required by the manufacturer's instructions. The bill also requires:

- Each school and child care center to develop and implement a plan for the maintenance of its water filters and filtration systems, which plan includes the creation of an inventory of water sources, regular testing of drinking water, and remediation efforts;
- Family child care homes to regularly test drinking water and take certain remediation efforts; and
- The department of public health and environment (department) to provide training to each school, child care center, and family child care home regarding water filter maintenance, flushing protocols, testing for lead, reporting processes for sampling reports, and other activities relevant to compliance with the bill's new requirements.

The bill creates the school and child care clean drinking water fund in the department and requires the department to expend money from the fund only to help schools, child care centers, and family child care homes pay for the costs of complying with the bill's new requirements.

The water quality control commission (commission) may enforce the new provisions by issuing administrative orders and assessing penalties but is not required to do so. On or before each December 1, starting in 2023, the commission is required to submit a report to legislative committees of reference with jurisdiction over public health matters, which report summarizes the results of the tests performed by schools, child care centers, and family child care homes and identifies noncompliant schools, child care centers, and family child care homes.
