Summary of Legislation

This bill allows small retailers to continue sourcing sales to their Colorado business location when collecting and remitting sales and use tax until October 1, 2022, an eight-month extension relative to current law.

Background

House Bill 19-1240 codified the Department of Revenue's destination-sourcing rules for state and local sales tax collection, requiring retailers to collect and remit sales taxes based on where a buyer takes possession of a purchase. The bill allowed small retailers, those with less than \$100,000 in annual sales, to source sales to their Colorado business location until an online sales tax rate lookup tool developed by the state was available. The bill gave small retailers 90 days after the tool was ready to begin destination sourcing. On April 1, 2021, the Department of Revenue sent a notice to retailers that the tool was ready to use and destination-sourcing rules would be required. Senate Bill 21-282 extended this deadline to February 1, 2022. This bill extends the deadline further, to October 1, 2022.

Local Government

The bill could increase or decrease city, county, or special district sales and use tax revenue depending on the business locations of small retailers and source of the sale as determined by the Department of Revenue's rules. The effect of the shift to destination sourcing on various taxing jurisdictions cannot be determined based on available information.

Effective Date

This bill was signed into law by the Governor and took effect on January 31, 2022.
