Revised Fiscal Note

(replaces fiscal note dated April 18, 2022)

Drafting Number:	LLS 22-1011	Date:	April 29, 2022
Prime Sponsors:	Sen. Zenzinger; Rankin Rep. McCluskie	Bill Status:	House Trans & Local Govt.
		Fiscal Analyst:	Marc Carey 303-866-4102 marc.carey@state.co.us

Bill Topic: STATE MATCH FOR MILL LEVY OVERRIDE REVENUE

Summary of Fiscal Impact:

<input type="checkbox"/> State Revenue	<input type="checkbox"/> TABOR Refund
<input checked="" type="checkbox"/> State Expenditure	<input checked="" type="checkbox"/> Local Government
<input checked="" type="checkbox"/> State Transfer	<input type="checkbox"/> Statutory Public Entity

The bill distributes state funds to eligible school districts to match local money raised through mill levy overrides according to a statutory formula. The bill increases state expenditures and local school district revenue on an ongoing basis.

Appropriation Summary: For FY 2022-23, the bill requires and contains a General Fund appropriation \$41,238 and a cash fund appropriation of \$20,000,000 million to the Colorado Department of Education from the Mill Levy Override Match Fund.

Fiscal Note Status: The fiscal note reflects the reengrossed bill.

**Table 1
State Fiscal Impacts Under SB 22-202**

		Budget Year FY 2022-23	Out Year FY 2023-24
Revenue		-	-
Expenditures	General Fund	\$41,238	-
	Cash Fund	\$20,000,000	\$20,000,000
	Centrally Appropriated	\$8,091	-
	Total Expenditures	\$20,049,329	\$20,000,000
	Total FTE	0.5 FTE	-
Transfers	General Fund	(\$20,000,000)	-
	MLO Match Fund	\$20,000,000	-
	Total Transfers	\$0	-
Other Budget Impacts	General Fund Reserve	\$6,186	-

Summary of Legislation

Beginning in FY 2022-23, the bill directs the Colorado Department of Education (CDE) to distribute to each eligible school district and institute charter school an amount of state matching money for local money raised through mill levy overrides (MLOs). To determine the state match, the CDE must calculate following:

- a district's MLO maximum, equal to the number of mills required to generate:
 - 25 percent of the district's total program for urban and rural districts;
 - 30 percent of the district's total program for small rural districts; and
- a district's MLO capacity, defined as the number of mills the district may be expected to levy toward the district's MLO maximum, based on the district's median household income.

If a district's MLO capacity is less than its MLO maximum, the district is eligible to receive a state match. The CDE must calculate the state match for each eligible district and institute charter school as specified in the bill and distribute the state match from the newly created Mill Levy Override Match Fund.

In a fiscal year in which the General Assembly does not appropriate enough money to fully fund distributions for eligible districts, the distribution to each eligible district and institute charter school is prorated based on the amount appropriated.

Background

Under current law and with voter approval, school districts may levy additional mills above the total program mills specified in the school finance formula. These mills are known as mill levy overrides, and have been levied by some districts since FY 1996-97. Districts designated as urban or rural by the CDE are authorized to levy MLOs sufficient to generate 25 percent of their total program before the budget stabilization factor. Districts designated as small rural may levy MLOs sufficient to generate 30 percent. In FY 2021-22, 124 of 178 districts levied MLOs, generating an estimated \$1.4 billion, equivalent to 43 percent of the school finance local share. In FY 2021-22, four districts levied their MLO maximum amount.

Assumptions

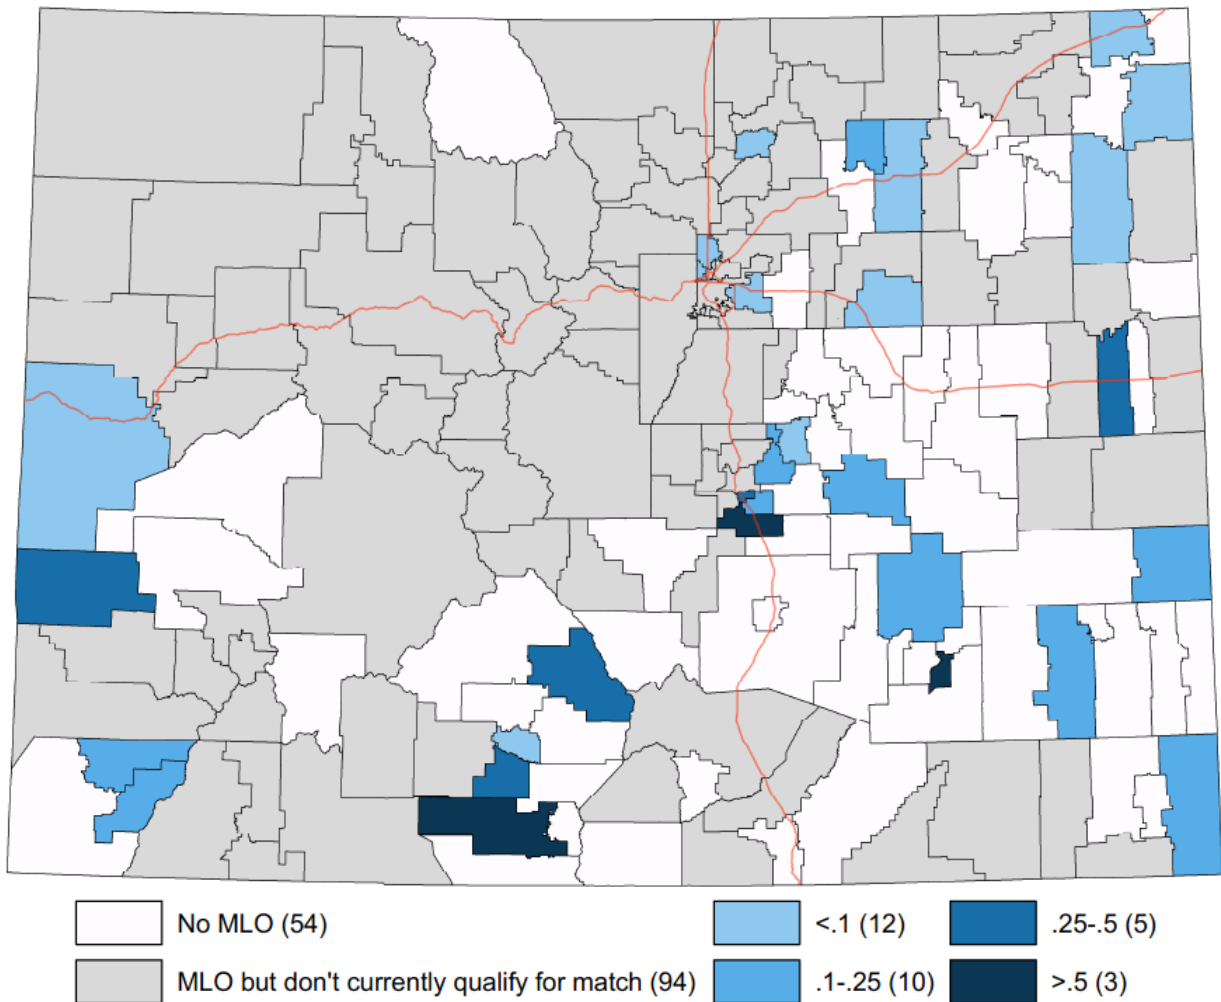

Colorado Association of School Executives (CASE) Model. This fiscal note assumes that the state match and district and institute charter school eligibility will be determined using a spreadsheet model, developed by CASE. The model depends on the following key structural assumptions:

- matching funds will not be provided for multidistrict online students in excess of 10 percent of the district's funded pupil count;
- district MLO maximum is defined as either 25 percent or 30 percent of the district's total program before the budget stabilization factor, depending on the category of district;
- district MLO capacity is defined as the district's relative ranking of median household income, normalized on the range of 15 to 35 mills;

- eligible districts are those whose MLO capacity is less than their MLO maximum;
- state support mills are the difference between MLO maximum and MLO capacity;
- district return on investment (ROI) equals support mills divided by MLO capacity;
- district state match equals MLO revenue scaled proportional to district ROI; and
- eligibility of and match amount for institute charter schools is determined by the school district in which they are geographically located.

Figure 1 shows a map of the 30 qualifying districts, and their return on investment for each 1 mill local MLO effort, with the \$20 million appropriation for matching funds contained in the bill.

Figure 1
Return on Investment from 1 Mill of Local MLO Effort
Currently Eligible Districts

State Transfers

The bill transfers \$20,000,000 from the General Fund to the Mill Levy Override Match Fund in FY 2022-23.

State Expenditures

In FY 2022-23 and thereafter, the bill increases state expenditures in the Colorado Department of Education by an estimated \$20.0 million. Expenditures are shown in Table 2 and detailed below.

**Table 2
 Expenditures Under Senate Bill 22-202**

	FY 2022-23	FY 2023-24
Department of Education		
Personal Services	\$34,363	-
Operating Expenses	\$675	-
Capital Outlay Costs	\$6,200	-
State MLO Match	\$20,000,000	\$20,000,000
Centrally Appropriated Costs ¹	\$8,091	-
Total Cost	\$20,049,239	\$20,000,000
Total FTE	0.5 FTE	-

¹ Centrally appropriated costs are not included in the bill's appropriation.

MLO state match. Using FY 2021-22 data and under the assumptions outlined above, the CASE model estimates that 30 districts with existing MLOs would be eligible for a state match. This bill contains a cash fund appropriation of \$20.0 million for state matching funds from the newly created Mill Levy Override Match Fund. Prorated district MLO matching amounts corresponding to the \$20 million appropriation appear in Appendix A.

If all districts enacted MLOs to the maximum allowable level, the model estimates that 72 districts would receive \$165.4 million in state matching funds.

Department of Education. CDE personnel will maintain and update the CASE model. District-level data to be maintained include funded pupil count, online pupil count, total program before the budget stabilization factor, online funding, assessed value, MLOs levied, and MLO revenue. CDE must also annually update district-level median household income information, available online. In FY 2022-23 only, 0.5 FTE is required to adapt the CASE model to a format accessible to school districts. The ongoing workload associated with maintaining the model can be accomplished within current appropriations, as the model is populated primarily with information that CDE already calculates in its normal course of business.

Centrally appropriated costs. Pursuant to a Joint Budget Committee policy, certain costs associated with this bill are addressed through the annual budget process and centrally appropriated in the Long Bill or supplemental appropriations bills, rather than in this bill. These costs, which include employee insurance and supplemental employee retirement payments, are shown in Table 2.

Other Budget Impacts

General Fund reserve. Under current law, an amount equal to 15 percent of General Fund appropriations must be set aside in the General Fund statutory reserve beginning in FY 2022-23. Based on this fiscal note, the bill is expected to increase the amount of General Fund held in reserve by \$6,186 in FY 2022-23, which will decrease the amount of General Fund available for other purposes.

School District

This bill provides a state match to 30 districts with existing MLOs totaling \$20.0 million, in FY-2022 23. Because the appropriation is less than the fully funded amount, district matches are scaled down proportionately. District level return on investment ratios and match amounts for the given appropriation are shown in Appendix A. If all eligible districts passed MLOs up to their maximum, the bill would provide a state match to 72 districts totaling an estimated \$165.4 million.

As discussed above, eligibility will be determined through use of the CASE model, and depends on district funded pupil count, online count, online funding, CSI count, total program before the budget stabilization factor, assessed value, a five-year average of district median household income, and district MLO effort. District eligibility and the amount of state match will be determined by formulas in the bill, and depend on a comparison of each district's MLO maximum effort and MLO capacity. The eligibility of and match amount for institute charter schools is determined by the eligibility and match amount of the school district in which they are geographically located. Match estimates are based on FY 2021-22 data, the latest actual data available.

Effective Date

The bill takes effect upon signature of the Governor, or upon becoming law without his signature.

State Appropriations

For FY 2022-23, the bill requires and contains the following appropriations to the Colorado Department of Education:

- \$20,000,000 from the Mill Levy Override Match Fund; and
- \$41,238 from the General Fund, and an allocation of 0.5 FTE.
