interjurisdictional emergency management agency, or homeowners' association that is located in or provides services to a wildfire risk area. The office is required to conduct an outreach and education campaign to advise eligible agencies of the program.

On and after July 1, 2026, each local and interjurisdictional emergency management agency that has jurisdiction in a wildfire risk area must perform evacuation and clearance time modeling and include the information in the emergency management plan for its area.

Section 2 requires that, beginning on January 1, 2024, for proposed developments of a certain size, a developer must perform evacuation and clearance time modeling for the proposed development and submit the information to the local government that will consider the application for a development permit for approval. A local government cannot approve an application for a development permit submitted on or after that date unless the application includes the evacuation and clearance time modeling and the local government determines that it is adequate for the proposed development.

1 *Be it enacted by the General Assembly of the State of Colorado:*
