direct-entry midwife student or trainee (licensee, student, or trainee) from performing, and prohibits a licensed health-care facility from permitting a licensee, student, or trainee to perform, an intimate examination on a sedated or unconscious patient unless the patient has given specific informed consent to an intimate examination. Additionally, a student or trainee may perform an intimate examination on a sedated or unconscious patient for educational or training purposes only if:

- The examination is related to the planned procedure to be performed on the patient;
- The patient recognizes the student or trainee as part of the patient's care team; and
- The student or trainee is under the direct supervision of the supervising licensee.

The bill outlines the requirements for obtaining the patient's informed consent. Failure to comply with the requirements of the bill, or retaliating against a person who complains about a violation of the bill, constitutes unprofessional conduct, is grounds for discipline, and subjects the licensee, student, or trainee to discipline by the regulator that regulates the particular health-care profession. A licensed health-care facility that fails to comply with the requirements of the bill is subject to sanctions imposed by the department of public health and environment.

Additionally, liability limitations otherwise applicable to health-care professionals and institutions under current law do not apply to a licensee that performs, or a licensed health-care facility that permits a licensee to perform, an intimate examination on a sedated or unconscious patient in violation of the requirements of the bill.
