enterprise's (transportation enterprise) powers and duties to expand its capacity to execute its charge and more explicitly prioritize mitigation of traffic congestion and traffic-related pollution through the completion of multimodal surface transportation infrastructure projects as follows:

- **Section 10:**
 - Authorizes the transportation enterprise to impose a congestion impact fee, as a new user fee, in maximum amounts of up to \$3 per day on the short-term rental of a motor vehicle that is powered by an internal combustion engine and up to \$2 per day for a motor vehicle that is a battery electric or plug-in hybrid electric vehicle that are subsequently adjusted for inflation, and, in conjunction with **section 9**, requires the fee to be collected and administered in the same manner as an existing state daily vehicle rental fee;
 - Clarifies that providing diverse multimodal transportation options, including rail projects, that reduce traffic congestion and degradation of existing surface transportation infrastructure is part of the transportation enterprise's statutory charge;
 - Clarifies that project-specific limitations on the expenditure of the transportation enterprise's project-specific user fee revenue, which do not apply to congestion impact fee revenue, allow multimodal improvements in the same travel shed where the fees were paid;
 - Requires the transportation enterprise to develop a new multimodal strategic capital plan that aligns with the 10-year transportation plan of the Colorado department of transportation (CDOT) and statewide greenhouse gas pollution reduction goals and priorities, complies with specified environmental standards adopted by the transportation commission, and prioritizes benefits to user fee payers and the reduction of adverse impacts on highways;
 - Requires the transportation enterprise to complete an initial assessment of opportunities available through 2030 to leverage federal money made available to the state and to thereafter assess such opportunities on an ongoing basis;
 - Clarifies the scope of an existing requirement of approval from each directly affected metropolitan planning organization and other transportation planning regions for a proposed surface

transportation infrastructure project that adds substantial capacity or significantly alters traffic patterns; and

- Requires the transportation enterprise to detail its work to reduce traffic congestion and greenhouse gas emissions and support the expansion of public transit in its annual report to the legislative committees with oversight over transportation; and
- **Section 8** modifies an existing definition of "surface transportation infrastructure" to more clearly include multimodal transportation options. **Section 8** also modifies an existing definition of "user fee" to include the new congestion impact fee and creates new definitions of "surface transportation infrastructure project network" (network) and "travel shed" to ensure, in conjunction with **section 11**, that the transportation enterprise's user fee revenue can be spent with more flexibility, from a geographic standpoint, than is currently the case.

Section 3 authorizes the regional transportation district (RTD) to extend construction and operations of its northwest rail fixed guideway corridor beyond its boundaries, including an extension of the corridor to Fort Collins as the first phase of front range passenger rail service in order to gain the opportunity to access federal intercity rail service money, if all capital and operating expenses outside the district are fully accounted for and already reimbursed to the district by a public body. **Section 3** also requires the district, in cooperation with CDOT, the transportation enterprise, and the front range passenger rail district (rail district), to provide to the transportation legislation review committee and the governor:

- A report containing an implementation plan, which must include, among other things, identification and evaluation of options for creating a separate legal entity or intergovernmental agreement as a business model, for construction and operations of the corridor to the legislative committees that oversee transportation and may also consider the creation of a Colorado rail authority to house some or all passenger rail services under one entity; and
- A report, which must also include the cooperation of any separate legal entity created, concerning a plan to begin providing front range passenger rail service no later than January 1, 2028.

Sections 4, 5, and 6 respectively provide specific, explicit authorization to the RTD, the rail district, CDOT, and the transportation enterprise in accordance with an implementation plan developed as required by **section 3** to enter into a standalone intergovernmental

agreement with or create a separate legal entity with each other, to implement the completion of construction and operation of the RTD's northwest fixed guideway corridor, including an extension of the corridor to Fort Collins as the first phase of front range passenger rail service. **Section 7** requires CDOT and the rail district to annually report to the legislative committees that oversee transportation regarding the status of the service development plan for front range passenger rail service between Trinidad, Pueblo, and Fort Collins.

Sections 1 and 2 make legislative findings and declarations.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds and declares that:

4 (a) Efficient, safe, and sustainable modes of transportation play a
5 vital role in the well-being of Colorado's residents and the prosperity of
6 its communities, and continued investment in transit and rail
7 infrastructure will foster economic development, reduce traffic
8 congestion, improve safety, mitigate environmental impacts, improve air
9 quality, and improve accessibility for all citizens, fostering a more
10 interconnected and vibrant state;

11 (b) The state needs to strategically address the growing challenges
12 of population growth and growth in recreational traffic and the associated
13 increase in demand for transportation alternatives, and the expansion and
14 improvement of transit and rail networks will alleviate traffic congestion
15 and wear and tear on highways and provide safer and more reliable
16 transportation options;

17 (c) A dedicated state funding source for transit and rail projects
18 is essential to building a comprehensive and integrated transportation
19 system that meets the diverse needs of Colorado's residents and visitors;

20 (d) All rental cars, regardless of where they are rented, use public

1 highways and have a large impact on our public highway systems, adding
2 congestion, wear and tear, and more greenhouse gas (GHG) emissions.
3 Additional cars on our roads from out-of-state visitors, in-state leisure
4 travel, heavy trucks, and vans for moving services have a documented
5 impact, and investments in offsets such as transit and rail services benefit
6 the drivers of those rental vehicles by reducing the amount of traffic
7 congestion that they encounter throughout the state. A generally
8 applicable fee on short-term vehicle rentals would equitably support
9 investment in such offsets to reduce congestion on the public highway
10 system.

11 (e) While out-of-state visitors and tourists have a positive impact
12 on our economy, the large amount of out-of-state visitors and tourism also
13 has a large impact on traffic congestion and conditions on our public
14 highway system and presents significant challenges to our ability to
15 manage growth in a sustainable way;

16 (f) Continued investment in transit and rail projects and services
17 advances Colorado's commitment to reducing air pollution, addressing
18 ozone nonattainment, safeguarding the environment and the health of its
19 residents by addressing climate change, and reducing GHG emissions that
20 create climate change;

21 (g) Although the general assembly and the federal government
22 have passed laws enabling investments to transition single occupancy
23 vehicles and other fleets to electric vehicles, the state cannot reach its
24 traffic congestion and GHG reduction goals without more transit and rail
25 options in the state to provide transportation alternatives and spur
26 transit-oriented development;

27 (h) Colorado charges road user fees for the purpose of improving

1 our surface transportation systems, and rental cars are one user of our
2 public highway system with a demonstrated impact on traffic congestion
3 on our public highways that could be alleviated and offset by providing
4 new transit and rail services that reduce the traffic congestion and wear
5 and tear they encounter;

6 (i) Rental cars account for over three percent of the vehicle miles
7 traveled (VMT) on Colorado roadways. Based on the "Urban Mobility
8 Report" produced by the Texas A&M Transportation Institute, the annual
9 cost of traffic congestion, which takes into account the cost of wasted fuel
10 consumption and travel delays, in the Denver metropolitan area alone was
11 \$2.394 billion in 2019, which comes out to \$1,263 per commuter and
12 \$21.50 per hour of delay. This suggests that the cost of congestion
13 attributable to rental cars statewide is at least \$74 million per year, and
14 likely higher. This impact from rental cars can be mitigated with new
15 investments in transit and rail. Investment in passenger rail systems and
16 additional revenue service miles of transit will offset VMT and reduce
17 congestion.

18 (j) The fee proposed in this legislation would also be applied to
19 the rental of heavy motor vehicles like moving truck rentals, which have
20 significantly higher wear and tear impacts to Colorado roads than
21 traditional passenger vehicles;

22 (k) The federal government has made available billions of dollars
23 to states, local governments, and private entities in the 2021 bipartisan
24 "Infrastructure Investment and Jobs Act". These federal grants usually
25 provide an 80% federal share and require only a 20% match from the
26 grant recipient, making passenger rail expansion a cost-effective tool for
27 reducing congestion but requiring more state matching money to access

1 federal dollars.

2 (l) Having adequate money to provide the non-federal match for
3 federal grants is essential to allow Colorado to take advantage of this
4 federal money;

5 (m) In 2021, the general assembly created the front range
6 passenger rail district. The Colorado department of transportation's
7 (CDOT) transit and rail division (division) is conducting a service
8 development plan for front range passenger rail to advance the direction
9 of that law. In October 2023, the transportation commission approved
10 funds to commence a service development plan for the northern rocky
11 mountain rail corridor extending from Denver through northwest
12 Colorado and long distance bus service expansion. The division will
13 complete these projects and continue to support project planning for
14 associated projects.

15 (n) Front range passenger rail would connect communities from
16 Fort Collins through Denver on to Trinidad through new passenger rail
17 service, shaping development in our state for generations to come and
18 unlocking smart urban planning decisions, density around transit hubs,
19 and mobility options for those who cannot access a car;

20 (o) As Colorado continues to invest in smart, dense
21 transit-oriented development, it needs high-capacity mass transit to help
22 meet the travel demands of residents, and density itself supports the
23 implementation of mass transit because higher levels of density and
24 transit service are strongly correlated with a reduction in vehicle miles
25 traveled and general car use, which helps increase affordability for
26 residents;

27 (p) Urgent action is also required to fulfill our commitment to

1 equity for a just transition for energy impacted communities such as Craig
2 and Hayden that have coal plants completely closing as soon as 2028. As
3 coal plant closures happen and the existing freight business ends with it,
4 we must ensure continuous use of that existing rail line through utilization
5 for passenger rail. As freight traffic volumes, types, and commodities
6 shift and change, we have an opportunity to partner with the freight rail
7 system for dual use of existing freight rail lines to include northern rocky
8 mountain passenger rail service. Establishing passenger rail service from
9 Union Station to west Jefferson County, Winter Park, Steamboat Springs,
10 Craig, and Hayden is a just transition strategy that also reduces traffic
11 congestion in the interstate highway 70 mountain corridor. This train line
12 uniquely fulfills several objectives of the state including relieving traffic
13 congestion in mountain corridors, supporting affordable housing for the
14 local workforce, and aiding coal-dependent communities in enhancing
15 and diversifying their economies.

16 (q) The southern segment of front range passenger rail is as
17 important as the north segment and the proposed northern rocky mountain
18 rail service. It is imperative that the state continue to pursue this
19 important segment that completes the vision for the full front range
20 passenger rail and is a linchpin to the new federal long distance plan for
21 the country that would create two new long distance service routes
22 through Trinidad connecting to the full proposed front range passenger
23 rail route. The new proposed long distance study map makes Colorado's
24 full front range rail route essential to a new route connecting through
25 Trinidad, Colorado to Albuquerque, New Mexico on to Phoenix, Arizona,
26 and an additional new route that would connect Trinidad to Amarillo,
27 Texas, to Dallas, Texas, and on to Houston, Texas. This makes the

1 southern segment of front range passenger rail not just an important
2 Colorado transportation solution but also of national importance to the
3 future national rail passenger rail network.

4 (r) In addition to the proposed future passenger rail service for the
5 northern Rocky Mountains, there are multiple other underutilized or
6 abandoned freight rail rights-of-way that could be repurposed for
7 passenger rail service to connect mountain communities with the front
8 range, and the state should continue to explore opportunities for
9 establishing more passenger rail services.

10 (s) Efforts to expand passenger rail must be complemented by the
11 expansion of a more comprehensive statewide bus system, especially on
12 key corridors like interstate highways 70 and 25, building on the
13 successes of initiatives like CDOT's Bustang, Snowstang, and Pegasus
14 bus services, with a commitment to improving convenience, and
15 accessibility for all Coloradans and contributing to reductions in GHG
16 emissions and traffic congestion.

17 (2) The general assembly further finds and declares that:

18 (a) The Colorado high performance transportation enterprise,
19 which has been doing business as the Colorado transportation investment
20 office (CTIO) since 2021, has a strong track record of using user fee
21 revenue to support the development of surface transportation projects
22 with the primary objective of alleviating traffic congestion within the
23 state;

24 (b) The CTIO has historically supported multi-modal
25 transportation through the expansion of commuting options in express
26 lanes and the distribution of transit passes to low-income residents, but
27 with the creation of the new dedicated revenue source provided for in this

1 act must now utilize its existing power and charge, as set forth in its
2 enabling legislation, to fund transit and rail projects to further reduce
3 traffic congestion on our highway system;

4 (c) It is necessary and appropriate to direct the CTIO to update its
5 strategic plan to incorporate policies implementing legislative direction
6 in Senate Bill 21-260, which tasked the transportation commission to
7 establish GHG pollution reduction planning standards and to contribute
8 to the state's implementation of House Bill 19-1261, which established
9 GHG reduction goals for the state;

10 (d) A major barrier to expanding transit and rail in the state of
11 Colorado is a lack of financing infrastructure and a dedicated revenue
12 source;

13 (e) The state needs a more equitable transportation system that
14 mitigates the impact that automobiles place on the public highway system,
15 and the state lacks the dedicated revenue source for transit and rail that is
16 needed to fund such a system and mitigate those impacts;

17 (f) This act directs the regional transportation district (RTD), the
18 front range passenger rail district (FRPRD), the transportation
19 commission and the board of directors of the high-performance
20 transportation enterprise to develop a plan for using their joint authorities
21 and funding streams to deliver the first phase of front range passenger rail
22 from Denver to Fort Collins and to use existing contracts to the extent
23 possible to facilitate the best means to deliver that project and to conduct
24 rail traffic controller modeling and other analyses for intercity passenger
25 rail from Union Station to Fort Collins for at least two scenarios,
26 including a scenario of three round trips per day and a scenario of five
27 round trips per day;

1 (g) As it is the desire of the general assembly to ensure not just
2 train service from Union Station to Fort Collins, but also daily service
3 from Trinidad to Pueblo to Fort Collins, this act also requires the FRPRD:

4 (I) To report to the general assembly regarding a plan and an
5 expeditious timeline by which the FRPRD will implement the whole
6 front-range rail train service from Fort Collins to Pueblo and Trinidad;
7 and

8 (II) To report periodically to the general assembly regarding its
9 planning and implementation progress and the barriers and challenges it
10 faces for extending service to the southern portion of the FRPRD,
11 encouraging the inclusion in each report of a detailed analysis of the
12 extent of coordination among the host rail companies; and

13 (h) In the near term, it is necessary and appropriate for CTIO to
14 use the new dedicated revenue stream provided for in this act to finance
15 service that originates from the service development plan for front range
16 passenger rail, the service development plan for the northern rocky
17 mountain rail corridor, the aforementioned statewide bus expansion study,
18 and other strategies to increase the use of public transportation.

19 (3) The general assembly further finds and declares that:

20 (a) The division will complete a report on the status of a service
21 development plan for the northern rocky mountain rail corridor by
22 December 31, 2024;

23 (b) The division has identified potential private partners to operate
24 new passenger rail services along the northern rocky mountain rail
25 corridor;

26 (c) Western slope communities in Grand, Routt, and Moffat
27 counties have existing and emerging transportation needs that are

1 currently underserved; and

2 (d) As it is the intent of the general assembly to ensure not only
3 expanded passenger rail service from Denver to Winter Park but also to
4 establish passenger rail service from Denver to Craig and Hayden, this act
5 also requires the division:

6 (I) To report to the general assembly regarding a plan and an
7 expeditious timeline by which CDOT will deliver passenger rail service
8 from Denver to the Hayden and Craig communities; and

9 (II) To report periodically to the general assembly regarding its
10 planning and implementation progress and barriers and challenges it faces
11 for extending service along the full length of the northern rocky mountain
12 rail corridor.

13 (4) The general assembly further finds and declares that once the
14 front range passenger rail line is completed and in service, the voice of
15 Senator Perry Will of Newcastle, Colorado shall be the official voice of
16 front range passenger rail and shall be used to make all announcements
17 on front range passenger rail trains.

18 **SECTION 2.** In Colorado Revised Statutes, 29-1-203.5, **amend**
19 **(1)(a)** as follows:

20 **29-1-203.5. Separate legal entity established under section**
21 **29-1-203 - legal status - authority to exercise special district powers**
22 **- additional financing powers. (1) (a) Any combination of counties,**
23 **municipalities, special districts, or other political subdivisions of this state**
24 **that are each authorized to own, operate, finance, or otherwise provide**
25 **public improvements, functions, services, or facilities may enter into a**
26 **contract under section 29-1-203 to establish a separate legal entity to**
27 **provide any such public improvements, functions, services, or facilities.**

1 IN ADDITION, SUCH A SEPARATE LEGAL ENTITY MAY BE ESTABLISHED AS
2 AUTHORIZED BY SECTIONS 32-19-119 (1)(w.5), 32-22-106 (1)(s.5),
3 43-1-106 (8)(q.5), AND 43-4-806 (6)(p.5). Any separate legal entity
4 established is a political subdivision and public corporation of the state
5 and is separate from the parties to the contract if the contract or an
6 amendment to the contract states that the entity is formed in conformity
7 with the provisions of this section and that the provisions of this section
8 apply to the entity.

9 **SECTION 3.** In Colorado Revised Statutes, 32-9-107.5, **add**
10 (1)(e) as follows:

11 **32-9-107.5. Regional fixed guideway mass transit system -**
12 **authorization - completion of northwest rail fixed guideway corridor**
13 **as first phase of front range passenger rail service - legislative**
14 **declarations.** (1)(e) THE GENERAL ASSEMBLY FURTHER DECLARES THAT:

15 (I) THE COMPLETION OF CONSTRUCTION OF A FIXED GUIDEWAY
16 MASS TRANSIT SYSTEM IN THE DISTRICT'S NORTHWEST FIXED GUIDEWAY
17 CORRIDOR BETWEEN UNION STATION IN DENVER AND LONGMONT, WHICH
18 WAS PROMISED AS PART OF THE DISTRICT'S FASTRACKS TRANSIT
19 EXPANSION PROGRAM APPROVED BY THE VOTERS OF THE DISTRICT IN 2004
20 BUT CURRENTLY OPERATES ONLY BETWEEN UNION STATION AND
21 WESTMINSTER, WILL HELP REBUILD CONFIDENCE IN THE DISTRICT, AND IT
22 IS OF CRITICAL IMPORTANCE THAT EVERY EFFORT BE MADE TO SECURE
23 SUFFICIENT FUNDING TO QUICKLY COMPLETE THAT CORRIDOR;

24 (II) THERE IS AN OPPORTUNITY TO OBTAIN SIGNIFICANT FEDERAL
25 MONEY FOR THE COMPLETION OF THE FIXED GUIDEWAY MASS TRANSIT
26 SYSTEM IN THE DISTRICT'S NORTHWEST FIXED GUIDEWAY CORRIDOR IF
27 SERVICE EXTENDS BEYOND THE BOUNDARIES OF THE DISTRICT TO FORT

1 COLLINS AND QUALIFIES AS INTERCITY RAIL AS A FIRST PHASE OF FRONT
2 RANGE PASSENGER RAIL SERVICE; AND

3 (III) ACCELERATING THE PROVISION OF FIXED GUIDEWAY SERVICE
4 ON THE NORTHWEST RAIL CORRIDOR AS THE FIRST PHASE OF FRONT RANGE
5 PASSENGER RAIL SERVICE WILL NOT IN ANY WAY SLOW PLANNING,
6 DEVELOPMENT, GRANT SEEKING, OR OTHER ACTIVITIES NEEDED FOR THE
7 EXPEDITIOUS DELIVERY OF THE REMAINING ELEMENTS OF FRONT RANGE
8 PASSENGER RAIL SERVICE OR UNFINISHED FASTRACKS PROJECTS.
9 FURTHER, EXISTING DISTRICT SERVICE WILL NOT BE IMPACTED OR
10 SACRIFICED AS A RESULT OF PLANNING AND DELIVERY OF THE FIRST PHASE
11 OF FRONT RANGE PASSENGER RAIL SERVICE. BY COMPLETING THE
12 NORTHWEST PORTION OF FRONT RANGE PASSENGER RAIL SERVICE, WHICH
13 WAS STATUTORILY REQUIRED TO BE PRIORITIZED IN THE LEGISLATION
14 THAT CREATED THE FRONT RANGE PASSENGER RAIL DISTRICT, THE
15 GENERAL ASSEMBLY INTENDS TO EXPEDITE COMPLETION OF THE ENTIRE
16 RAIL SERVICE.

17 **SECTION 4.** In Colorado Revised Statutes, 32-9-107.7, **add** (3)
18 as follows:

19 **32-9-107.7. Regional fixed guideway mass transit systems -**
20 **construction - front range passenger rail service - authorization -**
21 **completion of northwest rail fixed guideway corridor - limited**
22 **operations outside district.** (3) THE DISTRICT MAY EXTEND
23 CONSTRUCTION AND OPERATIONS OF THE NORTHWEST RAIL FIXED
24 GUIDEWAY CORRIDOR BEYOND THE BOUNDARIES OF THE DISTRICT IF ANY
25 AND ALL CAPITAL AND OPERATING EXPENSES THAT IT UNDERTAKES
26 OUTSIDE THE DISTRICT ARE FULLY ACCOUNTED FOR AND REIMBURSED TO
27 THE DISTRICT BY A PUBLIC BODY.

11 TO THE DEPARTMENT OF REVENUE, ADMINISTERED BY THE DEPARTMENT
12 OF REVENUE, AND FORWARDED BY THE DEPARTMENT OF REVENUE TO THE

5 WITH ITS NEXT INFLATION ADJUSTMENT WILL BE IMPOSING THE FEE AT A
6 RATE THAT GENERATES OR WILL GENERATE MORE THAN THE NEEDED
7 AMOUNT OF REVENUE, IT SHALL LOWER THE RATE AT WHICH IT IS IMPOSING
8 THE FEE OR FOREGO OR REDUCE THE INFLATION ADJUSTMENT TO THE
9 EXTENT NECESSARY TO ENSURE THAT IT IS CONTINUING TO IMPOSE THE FEE
10 AT RATES THAT ARE REASONABLY CALCULATED TO GENERATE ONLY THE
11 AMOUNT OF REVENUE NEEDED TO PAY THE OVERALL COSTS OF PROVIDING
12 THE SERVICES TO FEE PAYERS THAT WILL BE FUNDED WITH THAT REVENUE.
