

## OpiRescue and OpiRescue HQ

### About OpiRescue and OpiRescue HQ

OpiRescue is a smartphone app to help first responders recognize overdoses, reverse them with naloxone, and report them. OpiRescue HQ is a reporting and analytics program for first responder departments throughout the United States to track the reversals.

#### BENEFITS

- ✓ Distribute Substance Abuse Mental Health Services Administration (SAMHSA) guidelines for using Naloxone to reverse an opioid overdose to all officers/agents in your department
- ✓ Save time with filing reports on opioid overdose events directly from your smartphone (or computer)
- ✓ Collect geodata about your department's response to overdose events
- ✓ See agency level reports for response to overdose events
- ✓ Better understand the outcomes from overdose events in your area

#### Query and Report

First responders who use OpiRescue to assist with administering Naloxone for an opioid overdose can easily record the event and then print the details of the event to file an official report. Officers simply include their department and ID to get the report emailed to them. The app tracks opioid overdose reversals to the nearest cross-streets, compiling valuable data for outcome tracking.

#### Get OpiRescue HQ for your Agency

Registering your department with OpiRescue HQ is easy. OpiRescue HQ for departments is \$249 per year, which includes support for all the department's staff. Departments in certain counties in Colorado may be eligible for one free year of OpiRescue HQ as part of the Naloxone for Life Initiative.\* Visit [opirescue.com/HQ](https://opirescue.com/HQ) to get started today.
