**Semi-Annual Hospital Price Transparency Compliance Report
February 2022**

The Second Semi-Annual Hospital Price Transparency Compliance Report February 2022

Under the authority of the Affordable Care Act (ACA), a federal hospital price transparency rule¹ took effect January 1, 2021, requiring hospitals to post all prices online, easily accessible without barriers such as having to submit personal identifying information. Prices are required to be in the form of:

- A machine-readable standard charges list for all items and services for all payers and all plans as well as all discounted cash prices.
- A standard charges list or a price estimator tool for the 300 most common shoppable services.

The hospital industry fought the rule through lobbying efforts and in the courts, but a bipartisan array of district and appeals court judges rejected all legal challenges and upheld the price transparency rule in its entirety.²

In July 2021, the PatientRightsAdvocate.org research team conducted our first review of hospital compliance and found widespread failure of hospitals to fully publish their prices across all payers and plans. In our July 2021 report, we estimated that only 5.6% of the 500 random hospitals reviewed were compliant with the rule.³

January 1, 2022 began the second year of the legal requirements for hospitals to post all prices online. This February 2022 report assessed the compliance with the law by reviewing 1,000 U.S. hospitals out of the over 6,000 accredited hospitals in the country, including the original 500 hospitals we previously reviewed.

Of the 1,000 total hospitals reviewed, we found:

- Only 14.3% were complying with the transparency rule.
- Only 37.9% of the hospitals posted a sufficient amount of negotiated rates, but over half were not compliant in other criteria of the rule, such as rates by each insurer and named plan.
- Only 0.5% of hospitals owned by the three largest hospital systems in the country – HCA Healthcare, CommonSpirit Health, and Ascension – were in compliance.

Notably, only two of the 361 hospitals owned by these three hospital systems were compliant with the rule. Strikingly, for HCA Healthcare, the largest for-profit hospital system in the country, none of its 188 hospitals (0/188) were in compliance. In 2021, these three large noncompliant hospital systems' combined total revenue approached \$120 billion.⁴ The cost of compliance calculated in the rule is only \$12,000 per hospital.

The most prevalent omission deeming noncompliance was non-posting or incomplete posting of all of the negotiated prices for each item and service clearly associated with all of the payers and plans accepted by the hospital.

This report considers the multiple, detailed criteria required by the rule and may differ from other reports which may look only for the presence and categories of a hospital pricing file without regard to completion of all required data fields.

Methodology: PatientRightsAdvocate.org reviewed the websites of a total of 1,000 of the more than 6,000 licensed hospitals in the United States. We first evaluated the compliance of the 500 random hospitals analyzed in our July 2021 semi-annual report and reviewed an additional 500

hospitals subject to the rule. Our findings reflect good-faith analysis and opinions regarding compliance with the full price transparency regulations based on a review of publicly available hospital websites from December 7, 2021 through January 28, 2022. This report is not intended to constitute legal advice.⁵

A team of four PatientRightsAdvocate.org research analysts assessed the websites for hospital compliance. Separately, an independent review and validation of the report using a substantial sample of the data were performed from January 19 to 28, 2022 for PatientRightsAdvocate.org by FireLight Health LLC, an independent healthcare price data company with expertise in hospital price transparency data.

We analyzed each hospital website for inclusion of the required machine-readable file for all items and services, as well as the required price display of the 300 most common shoppable services (70 of which were mandated by the Centers for Medicare and Medicaid Services), either in a consumer-usable standard charges list or a price estimator tool. Within the required machine-readable files, we assessed the completeness of the required data posted including: all associated codes, description of each item or service, gross charges, discounted cash prices, de-identified negotiated minimum and maximum charges, and all payer-specific negotiated charges and clear identification of the negotiated charges with the name of the third-party payer and plan.

If a hospital posted a price estimator tool for the minimum of 300 consumer shoppable services, we evaluated whether consumers with or without insurance were able to access negotiated rates and discounted cash prices using the tool. However, it was not practical to evaluate whether *all* 300 shoppable services were available in each of the price estimator tools. Widely varied tool structures and barriers limited or blocked access to price estimates, making price comparisons for the same codes and services across plans unattainable. We were also blocked by barriers such as the collection of personal information and specific plan identification needed for input to receive an estimate. The rule, however, mandates hospitals enable access to prices without having to submit personally identifiable information.

We identified a hospital as noncompliant if it omitted any of the five standard charge criteria required by the rule, if it posted blanks or zeros in the data fields, if it did not provide descriptions of each item or service, if it did not post all negotiated payer rates associated with specific plans, or if the price estimator tool did not show both the negotiated rates and discounted cash prices to provide pricing for all healthcare consumers, including the uninsured and those desiring to pay cash directly.

Results: Based on our review, we estimate that only 14.3% of the 1,000 hospitals (143/1,000), were in compliance with all of the price transparency rule requirements. We estimate that 85.7% (857/1,000) were noncompliant, because one or more price transparency requirements were not met. See Appendix A for the list of compliant hospitals, Appendix B for the hospitals that posted no standard charges file at all, and Appendix C for the full evaluation of compliant and noncompliant hospitals.

Machine Readable File Compliance

The most significant finding of noncompliance is that the majority of hospitals did not post *all* payer-specific and plan-specific negotiated rates. We estimate that 85.7% (857/1,000) of the hospitals *did not post a complete* machine-readable file of standard charges. We also found noncompliance due to incomplete or missing data fields, or fields with zeros, N/A's, and asterisks for negotiated rates. We frequently found that hospitals listed a far greater number of 'accepted insurance plans' elsewhere on their websites than they showed in their standard charges file, implying that their standard charges file did not include all accepted plans. Many hospitals identified only payer names and not the associated

plan names.

We estimate that:

- 85.7% of the hospitals (857/1,000) of the hospitals did not post a complete machine-readable file of standard charges.
- 84.9% of the hospitals (849/1,000) failed to provide the national drug codes (NDC) and associated prices for each of the drugs and pharmacy items offered.
- 62.1% of the hospitals (621/1,000) did not publish a sufficient amount of negotiated rates.
- 58.6% of the hospitals (586/1,000) did not publish all payer-specific negotiated charges “clearly associated with the names of each third-party payer and plan” as required by the rule.
- 26.2% of the hospitals (262/1,000) did not publish any discounted cash prices.
- 4.1% of the hospitals (41/1,000) did not post any standard charges file. These hospitals are listed in Appendix B.

300 Shoppable Services List Compliance

We reviewed each hospital for compliance with the requirement to publish 300 shoppable procedures and services displayed in either a consumer-friendly list or a price estimator tool. We estimate that:

- 28.7% of the hospitals (287/1,000) presented 300 shoppable services in a consumer-friendly display for customary charges. However, 216 of these hospitals remain noncompliant because their standard charges files were incomplete.
- 84.7% of the hospitals (847/1,000) published a price estimator tool. Out of these 847, 20.4% of them (173/847) did not allow uninsured patients or those seeking to self-pay to see the discounted cash prices, a clear violation of the regulatory requirements.

Several types of price estimator tools were offered, and their design makes it impossible for a consumer to access actual prices by procedure or code, and also inhibits the ability of consumers or developers to compare prices, scrape, or parse the data within the tool.

Discussion: More than one year has passed since the hospital price transparency rule took effect. As of the date of this publication, our analysis suggests that the vast majority of hospitals remain noncompliant with the rule. These findings align with our original report as well as recent news reports indicating that hospitals continue to flout the rule by providing incomplete or inaccessible pricing information.⁶

Our analysis included a review of the websites of hospitals owned by the three largest hospital systems: HCA Healthcare, CommonSpirit Health, and Ascension. We estimate only two out of their combined 361 hospitals to be in compliance (See Table 1). The January 2022 rule⁷ established penalties

Health System	2021 Revenue	# of Hospitals	Compliant Hospitals	%
HCA Healthcare	\$58.8 billion	188	0	0%
CommonSpirit Health	\$33.3 billion	88	1	1.1%
Ascension	\$27.2 billion	85	1	1.2%
Total	\$119.3 billion	361	2	0.5%

for noncompliance to be only \$300 per day for hospitals with less than 30 beds, and \$10 per bed per day for hospitals with 31 or more beds, to a maximum daily penalty of \$5,500. At the time of this report, no hospitals have been reported to be issued a penalty for noncompliance by the Department of Health and Human Services (HHS).

This widespread noncompliance and inability for patients to access meaningful, comparative price data raises the need to address several important issues:

1. *Penalties for Noncompliance:* Although the Biden Administration increased the civil monetary penalties (CMPs) for noncompliance in November of 2021, the penalties may not have been set at a level adequate to fully incentivize compliance.
2. *Enforcement and Disclosure of Noncompliant Hospitals:* While the government has issued warning letters to noncompliant hospitals, none have been reported to have been assessed any penalties. Improved enforcement efforts and potential public disclosure of noncompliant hospitals are likely to positively impact compliance.
3. *Actual Prices vs. Estimates.* “Price estimator tools” generally provide, non-binding estimates (including price ranges) accompanied by disclaimers. This practice is materially different from actual price disclosure and from an audit and assessment standpoint, impossible to equate with its permitted alternative, the 300 Shoppable List.
4. *Clear Pricing Data Standards.* Implementing clear pricing standards, including uniform data file standards, will enable more efficient and reliable compliance audits and likely better serve the intent of the rule by enabling technology innovators and search engines to design online shopping tools and other services that will foster price comparison and competition.

Future Compliance Reports

Our future compliance reports may include additional assessment criteria due to (1) further clarification, guidance, or rulemaking and/or (2) inclusion of items currently required under the rule that were not assessed in the report due to time and resource limitations.

We applaud the 143 hospitals that we estimated to be in compliance with the rule, and we encourage HHS to strongly enforce the rule to compel the remainder of the hospitals to comply. Widespread availability of hospital pricing data in full compliance with the rule, combined with the *Transparency in Coverage Rule* effective on July 1, 2022, will unleash the benefits of competition to foster a functional marketplace in healthcare and health coverage. These rules are to give broad access to pricing information, empowering consumers and employers to benefit from competition and improve quality while driving down the costs of care and subsequently, coverage.

Implications of Report Findings

We are now entering the second year since the hospital price transparency rule became law, and compliance remains at very low levels. The largest hospital systems are effectively ignoring the law, with no consequences.

The lack of compliance by hospitals is about more than simply the failure to follow the legal requirements. It is also about the failure of hospitals to provide critically needed information to consumers so they can make better health decisions. Empowered with comparative price and quality information in advance of care, consumers, including employers and unions, can improve health

outcomes while lowering costs by taking advantage of the benefits of competitive market efficiencies. Moreover, known prices help prevent billing errors, overcharges, and fraud.

Only with timely and full compliance from hospitals with the hospital price transparency rule and from insurers and health plans with the *Transparency in Coverage Rule* starting July 2022, will such benefits of price transparency through competition and choice be deployed.

Price transparency is a crucial first step toward a more transparent, competitive healthcare system. Today, because of hidden prices and the lack of a functional market, the United States is paying double that of other developed countries for our healthcare, and with worse health outcomes and shorter life spans. Competition lowers costs of care to employers and workers, allows for higher wages, and results in a more globally competitive U.S. economy. Only with true compliance with both price transparency laws and regulations will such long-term goals be realized.

APPENDIX C: Semi-Annual Hospital Price Transparency Compliance Report Evaluation Data

LEGEND

To be fully compliant, a Hospital must have:

- A Complete Machine-Readable Standard Charges File; and
- Either:
 - A consumer friendly '300 Shoppable Services List'; or
 - An online Price Estimator Tool

A Complete Machine-Readable Standard Charges File must meet the following criteria. Any hospital that failed to meet any one of the following criteria (with a 'no' answer to any of the questions) was found to have an incomplete machine-readable standard charges file and was found to be NONCOMPLIANT.

CRITERIA	DESCRIPTION
Codes	Did the hospital post one or more of the mandated codes used by the hospital for accounting or billing (e.g. CPT, HCPCS, DRG, NDC) for each of its items and services?
Gross Charge	Did the hospital post gross charges for at least 50 percent of the items and services identified?
Discounted Cash Price	Did the hospital post discounted cash prices for at least 50 percent of the items and services identified?
Negotiated Min	Did the hospital post the de-identified minimum negotiated charge for at least 50 percent of the items and services identified?
Negotiated Max	Did the hospital post the de-identified maximum negotiated charge for at least 50 percent of the items and services identified?
Negotiated Rates	Did the hospital post the payer-specific negotiated charge that applies to each item or service, for at least 50 percent of the items and services identified?
Payer and Plan	Did the hospital post all payer-specific negotiated charges (for all payers and plans at the hospital) in a manner clearly associated with the name of the third-party payer and specific plan, for at least two payers including Blue Cross Blue Shield, United, Cigna, Anthem, or Humana?

We also analyzed each hospital for the following criteria regarding 'shoppable services.' If a hospital's Standard Charges File satisfied each of the above criteria, but it did not also offer either a '300 Shoppable Service List' or an online Price Estimator Tool (PET), it was found to be NONCOMPLIANT.

CRITERIA	DESCRIPTION
300 Shoppable Service	Did the hospital post a list of 300 shoppable services?
Price Estimator Tool (PET)	Did the hospital post a link to a functional price estimator tool?
PET Provides Cash Price	If the hospital has a price estimator tool, does it provide cash prices for items or services that are accessible by an uninsured person?

If a hospital was found to have both a complete machine-readable file of standard charges, and either a 300 Shoppable Service list or PET that provided a cash price, it was found to be COMPLIANT.

Hospital	City	State	Compliance	Complete Standard Charge File											Explanation	Review Date
				Codes	Gross Charge	Discounted Cash Price	Negotiated Min	Negotiated Max	All Payers and Plans	300 Shoppable List	Price Estimate Tool (PET)	PET Provides Cash Price
