If we really want to protect the immuno compromised and other fragile people, we need to address the present-

^{PRESENTISM} ~~FEELISM~~ amongst the medical staff. 83% amongst doctors & 64% amongst nurses (source ncbi.gov; look up presentism) certainly does not help.

When the flu shot is considered effective only 9% (NINE PERCENT), as at the end of the 2018/2019 season, how is that help protect patients?

Would hospitals force their staff to wear masks or gloves that were only 9% reliable? Torn gloves, anyone? Non-filtering masks?
