

My name is Roxie Olson. I am a mother and grandmother and have been a professional in the field of Developmental Disabilities since 1974. Like you, my primary concern is the health and safety of our precious children. Because of that concern, I am asking you to vote NO on HB 19-1312. I have personally spent hundreds of hours researching immunology and vaccine science. There is simply not enough time left in this legislative session to do the unbiased, objective investigation your constituents expect and deserve given the far-reaching effects of this bill. Despite what has been stated by proponents of this bill, many of the often-touted arguments are not "settled science" but OUTDATED science.

Consider this: Vaccines are regulated by the FDA's Center for Biologics Evaluation and Research because they are in a different category than drugs. They are not always put through the same level of safety testing as new drugs. Inadequate testing ensures that the true

risk benefit assessments for the safety and cost of vaccines are impossible to calculate effectively. There is inadequate follow up for adverse events. There is lack of placebo controls.

There are NO STUDIES OF VACCINATED VS. UNVACCINATED CHILDREN. In the words of the IOM (Institute of Medicine), which studied the entire Childhood Immunization schedule, "No studies have compared the differences in health outcomes...between entirely unimmunized populations of children and fully immunized children. Furthermore, studies designed to examine the long term effects of the cumulative number of vaccines or other aspects of the immunization schedule have not been conducted."

In addition, the FDA's approval of new biologics is largely funded by the pharmaceutical industry.

The pharmaceutical industry loves vaccines for the US market because:

- 1) They have no liability for any injuries or deaths caused by vaccines.
- 2) They can charge high prices for new vaccines, negotiate behind closed doors what the government will pay for them and get half of the vaccines they produce paid for by the government and distributed by the government.
- 3) They have people who have financial ties to their companies sitting on the committee that recommends vaccines to be added to the schedule.
- 4) They can lobby in state houses to get legislators to mandate vaccines for school attendance and to prevent anyone from opting out, to maximize their markets.
- 5) The FDA allows them to get away with substandard studies before licensing and doesn't require them to follow up reported adverse events.

There should be no new legislation mandating vaccines until studies PROVE the safety and efficacy of every ingredient in these drugs. A good step for you to take as representatives of the citizens of Colorado would be to demand follow-through by the CDC and other governmental agencies to this end.

Please take the time to investigate all the available literature on vaccines. I recommend to you, as a start, "Miller's Review of Critical Vaccine Studies" by Neil Z. Miller. It is fully sourced and referenced. And is just the tip of the iceberg of immunization studies.

The highest stakeholders in this debate are and should be the families themselves. We all desire the best possible outcome for ALL Colorado children. Parents and personal physicians should be making these decisions on a case by case basis, not a mandated, one size fits all approach.

Madam Chair and committee,

Thank you for the opportunity to share with you. My name is Sarah Ng and I am a constituent of Sonja Jaquez Lewis and a mother of two children who have both been vaccinated and are genetically susceptible to adverse reactions.

I am asking you to vote no on this bill today.

I am concerned with page 8, lines 9-15 and page 10 line 1. Together these require the state to adopt the guidelines of the ACIP for medical exemptions and then administer and enforce these immunization requirements. With what force exactly will they be required to do this? Will they be forcing people to be vaccinated against their doctors' recommendations if it doesn't line up with the ACIP guidelines?

The exemption recommendations of the ACIP are extremely limited and exclude a plethora of severe and potentially deadly reactions, including those of my children. Informed consent is the bedrock of ethical medical practice in this country¹. Vaccines are pharmaceutical products that carry risk of injury, death and failure². We must preserve every persons' right to refuse the medical intervention of vaccination because of these risks.

In light of the fact that human beings have different genetic makeups³ and unique microbiomes influenced by epigenetics⁴ that can influence how their body responds to different foreign substances, it is unethical to require that every person be treated with a one size fits all approach regarding vaccination, which is what the ACIP guidelines are. We all respond differently to diseases⁵ and to vaccines^{6,7,8,9}. Doctors and patients need the freedom to make these decisions free from coercion by a governmental agency.

We all agree that the death or injury of any child due to an infection like measles or due to the measles vaccine is a tragedy that we would prevent if it were possible. But until a vaccine can

be guaranteed 100% safe for everyone we must preserve every parent's right to determine for their children with their own doctor which risk they are willing to take, the infection or the vaccine.

Again, my objections are that this bill infringes upon parental rights to informed consent, bodily sovereignty, and healthcare freedom of choice. It creates burdensome paperwork and tracks citizens based on their healthcare choices.

We all have the same goal of healthy kids and healthy communities. I ask you to vote no on this bill and protect informed consent and true freedom in the medical exemptions process.

Thank you for your time.

HOUSE WRITTEN TESTIMONY SHEET

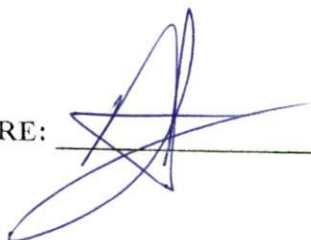

DATE: 4/15/2019
 BILL #: HB 19-1312
 PRIME SPONSORS: Dr. Kyle Mullica

NAME: Patrick Jones
 PHONE #: 3-859-0605
 FOR: _____ AGAINST: X

WRITTEN TESTIMONY:

Dear chairman & committee members,
 traditional vaccination has only an
 88%-90% efficacy & all excipients used
 to deliver these vaccines can & will
 produce detrimental health consequences
 when administered individually. Packaging
 with a helpful vaccine does nothing
 to increase the safety of these excipients.
 In the "name of safety", the Colorado
 legislature is attempting to thwart a
 parents constitutional right in deciding
 how to best raise their child(ren).
 This attempted legislation will effectively
 reduce our freedoms ^{set forth} in our constitution,
 as well as diminish parents rights
 when raising the next generation.
 Furthermore, a 100% vaccinated community
 only has an 88-90% efficacy which
~~is still~~ still inadequately address the
 safety concerns for mandated vaccination.

FOR: _____ AGAINST: HB 19-1312

WRITTEN TESTIMONY:

I Dominique Nevarez am Opposing HB19-1312 on behalf of myself & vaccine injured children. 3 which in fact were injured by vaccines MMR, Flu shot. I have dealt with an unimaginable horrible childhood w/my own children. They were injured @ Birth w/the Vitamin K shot. All 3 have developed Jaundice after the shot. My 9 year old has many problems more than the other 2. My small 7 year old has developmental problems such as speech, visual, skin, just to name a few. I recently had a daughter Pauline, she is 5 months old now & NO vaccinations and IS PERFECTLY HEALTHY. She has already surpassed all milestones. ALL. Especially being told by her pedi., then being told I was fired & cannot return to the clinic unless they can pump her w/toxins. A perfectly healthy girl. It is against our religion to pump ⁱⁿ aborted fetus into our blood. This bill goes ~~against~~ against our constitutional right! Thank you for all that you do and be a voice for the babies who depend on your decision. Please

4/15/19 HB19-1312

Leigh Wallmann
808-443-9230
AGAINST

I OPPOSE house bill 19-1312 because of it's discriminatory elements, violation of privacy, unnecessary insertion of government and violation of freedom.

1. Under this bill and with the current exemption form available by the department of health, parents wanting exemptions would need to sign a form acknowledging a biased and potentially incriminating statement that is against my belief.
 - i'd like to share with you why I don't agree with statement but today, I don't have time.

2. The statement on the current exemption form and the process of submitting the form are discriminatory and a violation of privacy
 - only exemption parents must submit IN PERSON
 - which means only exemption children bypass FERPA & have records accessible
 - only those seeking exemptions must acknowledge a statement of endangering children
 - even though the CDC acknowledges that some vaccines shed exposing immunocompromised and infants to these diseases
 - AND Merck's manual states, "no vaccine is entirely safe or completely effective
 - all of these requirements are discriminatory against those seeking exemptions

3. Bypassing FERPA & opening records is
 - violation of privacy
 - state doesn't need to know my child's health status
 - other means to track anonymously through the schools

4. Unnecessary Insertion of government
 - into an already effective process of enrollment and public health procedures
 - as well as which vaccines are required

5. This bill would also limit the Medical exemptions
 - did you know that under ACIS
 - Steven-Johnson syndrome, an extremely painful reaction where a child's entire skin blisters including the eyes & other mucous membranes then peels off, is NOT allowed a medical exemption
 - sibling DEATH even though they share similar genetic make-up and are at greater risk of adverse reaction, does NOT meet medical exemption criteria
 - my several autoimmune diseases, two of which can be life threatening, were triggered by a vaccine and are NOT considered a medical exemption
 - even though they are listed as contraindications on the CDC website.
 - doctors and patient history should be what determines medical exemptions NOT the government or a branch of the CDC

This bill is faulty in many ways so for the rights & safety of ALL children, I urge you to vote NO to HB19-1312.

Thank you

4/15/19

The reasons why the “endangering” statement is biased and against my beliefs:

1. The reactions and injuries my child and I have suffered from vaccines
2. Our several autoimmune issues which do not qualify as medical exemptions even though they are listed as contraindications on the CDC website
3. Pharmaceutical companies are exempt from liability on their own products
4. \$4 billion of tax payer funds has been paid out of vaccine injury court
5. Vaccines are not tested under the same requirements as any other pharmaceutical product. In fact, all other pharmaceutical products must be tested for 4-5 years. Vaccines are tested for 4-5 days.
6. No testing for multiple injections at one time. Although a 2005 study by Dr. Boys Haley found that the neuron-killing capacity of mercury was almost doubled when combined with aluminum. This happens often with CDC recommended injections.
7. Other pharmaceutical drugs, such as FLQ antibiotic, were taken off the market by the FDA due to “unacceptable risks and side effects.” Omniflox is one and its side effects were low blood sugar, kidney failure, and a rare form of anemia. Yet, vaccines, which have been proven by VAERs and by the vaccine injury court to have severe side effects and even DEATH, are still being used and in some places mandated.
8. The overwhelming number of vaccine injuries and deaths reported to VAERs, including 400 deaths in 2018 alone.
9. The many accounts of multiple doses of the same vaccine, yet still not testing immune
10. Merck’s manual states, “vaccines are not entirely safe or completely effective”
11. The noted cases of ineffective protection of vaccines such as the whooping cough in California
12. The same dosage is given to a 9 pound baby and a 180 pound adult
13. A 6 in 1 vaccine was recently approved by the FDA even though several babies DIED in the trial
14. The CDC holds 56 patents and buys and sells \$4 billion of vaccines PER YEAR
15. There are homeoprophylaxis is available and in at least one case, showed elevated titer numbers/immunity for measles.
16. The CDC’s own contraindications would not qualify as medical exemptions by ACIS
17. The toxic ingredients including adjuvants and preservatives used in vaccines
18. The cancer causing (proven in court recently) GLYSOPHATE has been found in vaccines
19. The aborted fetuses that are used in the creation of vaccines and the trace amounts that are still in them when injected
20. The other human material (blood, urine) used in vaccines
21. The animal material and DNA that is used in the creation of vaccines and injected in trace amounts
22. 2 Timothy 1:7 states, “For God has not given us a spirit of fear, but of power and love and of sound mind.”

[REDACTED]

I oppose HB 19-1312 for many of the reasons already states today; it's discriminatory, it violates our privacy, it violates our rights of freedom and it unnecessarily inserts government into an already effective process.

SO, I like to take a different approach by asking some questions that I'd like for you to consider.

Are those asking for exemptions truly "endangering" anyone? Unvaccinated or partially vaccinated people exist all over the public sector because most adults don't receive boosters and are therefore not "immune". Unless someone has contracted a disease, they are no risk to anyone. However, those recently vaccinated can pose a threat to immunocompromised and infants (per the CDC) through shedding.

Is the current method of filing exemptions faulty?

How will the state pay for the additional staff salary and benefits for the signing of forms, filing of forms, entering data and monitoring? What kind of new training and computer programs will be needed to track this data? And how much will that cost tax payers?

What will this bill accomplish? On the website it states that this bill is to increase vaccine rates. Do we have a problem with vaccine rates? Are there any outbreaks? Is reducing the availability of medical exemptions an ethical way to do so? We are already within "herd immunity ranges (see CDPHE's data), so what will increasing vaccine rates accomplish? In

China, there is a 99% vaccination rate yet they still see outbreaks. Because vaccines shed and are not 100% effective, even at 100% vaccination, we'd still have potential for outbreaks.

Vaccine	Fully immunized rate	Exemption rate
DTaP	94.35%	2.64%
Hep B	94.68%	2.88%
MMR	94.53%	2.87%
Polio	94.32%	2.83%
Varicella	92.89%	3.53%
Tdap (6th grade and up)	90.50%	2.80%

Herd Immunity Threshold

— Estimated % coverage needed to prevent disease from persisting in population

Diphtheria	85%
Pertussis	92-94%
Polio	80-86%
Measles	83-94%
Mumps	75-86%
Rubella	83-85%

Is there a need for this bill?. Vaccine rates are already within “herd immunity ranges”. There are no “outbreaks” in CO. In fact, since 2014, each year CO has seen between 0-2 cases of measles but no outbreaks. Thus, the current system of enrollment and public health response is effective. There have been no reports of doctors taking advantage of the medical exemption. So why do we need this bill?

So I ask again, why has this bill even been introduced? Many of you on this panel stated things like “the rights of Coloradans”, “keep our kids safe”, “opportunity to succeed”, the “Colorado way of life”, “safe, fair and inclusive for ALL Coloradans”, “decisions in the hands of citizens and not government”, and “keep government smaller so people may grow freer”. This bill does NONE of those things. In order to stand by your promises, you MUST vote NO on this bill!

FOR: _____ AGAINST:

WRITTEN TESTIMONY:

My family moved out of CA in 2015 when SB277 passed. We came to Colorado believing this state valued personal freedom. It seemed I may have been wrong! HB 19-1312 is a slippery slope that compromises privacy rights. This bill circumvents FERPA. It appears to be designed to intimidate parents & doctors to coerce them into complying. My children's health is my & my doctor's business, not the state's. Exemption should be decided by doctors, not the state. The process is fine as it is. If Colorado wants to track vaccination rates that can be done without violating personal privacy. ~~Please~~ Thank you for taking the time to read this.

Sincerely

1. My first concern is that this legislation is unnecessary. More than one of the sponsors has indicated that the purpose of the bill is to increase vaccination rates. With an exemption rate less than 3% (which includes every child who exempts from even one vaccine but receives all others), there is no legitimate reason to pressure more people into vaccinating. What we have been doing is working; Colorado children are among the healthiest in the country.

2. My second concern is that this legislation uses coercion to increase the use of liability-free vaccines instead of demanding safer vaccines for the children of Colorado.

Children in the USA are not dying of measles.

I know; I've heard the sensationalized media accounts that make it sound like we have a zombie emergency on our hands. But if you do some fact-checking, you will see that ALL cases of measles, anywhere in the USA, have all fully recovered, usually in a week or two.

However, children ARE dying and they need your protection.

- Over 1,300 children die of cancer every year;

THAT should be considered an emergency.

THAT should prompt legislation to require that all childhood vaccines be studied for carcinogenesis.

- Over 1,500 infants die of "unexplained causes" every year. The majority of those deaths occurred after a healthy well-check and vaccination.

According to CDPHE, about 50 Colorado infants die each year of "unexplained causes."

WHY you are writing legislation based on a hypothetical outbreak of a disease which has not resulted in any deaths in over 10 years?

You should be writing legislation to protect the FIFTY Colorado babies that ARE dying every year.

Please vote NO on this bill.

My Name is Dorine Tchoudine. I represent myself & I oppose this bill

I was born in a small country called Moldova, it used to be part of the Soviet Union. It was not easy as seventh day Adventist a protestant to grow up there. Often, I had to sneak out through the back window out of bible school class because the police was there with dogs to intimidate church goers and to make sure no children were taught the bible. There was a lot anti-religion propaganda. So in the society, we were often ridiculed as crazy people, people with no common sense, anti-science people. We were considered a danger to the society so much that some of our church leaders which were often our parents were jailed. The government would keep track of our religion affiliation and based on that would limit any education past high school.

I immigrated to this country because of freedom and protection its provides for its minorities. Me and my wife (who is a registered nurse) are minorities today based on our conscious decision about vaccines. I am here to tell you today NO MATTER HOW GOOD YOU THINK THE CAUSE is it is NOT ok to force a medical procedure on somebody against their will and conscious, is not ok to force somebody to sign something against their will, its NOT to track someone's medical choices. But you might say I can opt out and homeschool. I am here to tell you it's NOT ok to limit education option of a perfectly HEALTHY individual based on their choices of their conscious. As witness to an oppressive government I am asking you today to look in your souls and ask yourself are you willing to oppress, bully and persecute minorities because this what exactly this bill does.

Thank you for your time.

DORINE Douglas county Resident
(303) 717 4220

Hello, I am Blake Ford Postles. I am 12 years old, an American citizen and proud of that. My family and I live a healthy lifestyle as free as possible from toxins and dangerous chemicals.

I wish to make these statements regarding HB19 -1312

1. I believe that Americans have the right to control over their own body. That parents have the right to chose how they bring their children up including what schools they attend and what substances they pit in their bodies to make and keep them well.
2. I understand that mandatory medication or medication without informed consent is not only a violation of the American Constitution but a violation of international treaties.
3. I understand that force and coercion (financial, physical or educational choices to name a few) invalidates informed consent.
4. I know that the Hippocratic Oath says first - do no harm. With over \$4 Billion having been paid out for vaccine damage in America so far his bill violates the basic principles of good medicine.
5. Vaccines are not safe and there is good science to show that they are not effective.
6. There has never been a scientific study that compares the health outcomes of vaccinated children to unvaccinated children.

7. My last point is that immunisation is NOT the same as vaccination. This Bill is flawed in that it proposes Immunisation but has no allowance for determining if the recipient is immune BEFORE applying the vaccination treatment and there is no allowance for determining that the recipient is immune AFTER the vaccination. This is poor science even for a 6th grader .

I pray that you will consider these words and act with caution as you are playing with the lives of the future leaders of Colorado and America.

The literature has ample evidence to suggest that your decision to enact this legislation could lead to severe damage to many now healthy children and I beg you to reason this decision through logic.

Thank you

Dr Mark Postles

HOUSE WRITTEN TESTIMONY SHEET

DATE: April 15, 2019
BILL #: HB 19-1312
PRIME SPONSORS: Mullica

NAME: Kharis Erasmus
PHONE #: 303-552-1425
FOR: AGAINST: X
Representing: self

WRITTEN TESTIMONY:

Dear respected Colorado State Legislators of 2019,
Someone once said, "Evidence does not persuade the unwilling."
Please hear the voices of the people. I believe the most
basic freedom is sovereignty over our own bodies & our own
children's bodies. Did you know that in 2014, the United Arab Emirates
passed a law forcing mothers to breast feed their children for two years, or face
the possibility of punishment? Force. One philosophy ruling, or consequences.
Please do not move Colorado toward this type of gov't system. I have
two major concerns: Giving the CDPHE such a massive amount of power
over ^{our} children's bodies could be very harmful. What will drive their decision-making?
What if their data has measures of mistakes? Who will hold them in check?
"When we give government the power to make medical decisions for us,
we in essence accept that the state owns our bodies." (Ron Paul) Creating a
registry of those who delay vaccines or opt out could create harm upon
sincere & diverse people. Who would have access to this data warehouse?
What happens if or when employees subvert controls within the technology
systems? "When there are lots of people with their hands on the data,
that's when we find the biggest problems." (Katherine Barret) "If the State
can tag, track down & force citizens against their will to be injected with
biological products of known & unknown toxicity today, there will be no
limit on which individual freedoms the State can take away in the name
of the greater good tomorrow." (Barbara Low Fisher, nivic.org)

WRITTEN TESTIMONY:

Thank you Madam Chair, My name is Jesse Alberts & I oppose house bill 1312. This bill does not promote safety, as vaccines are clearly unsafe, just look at the numbers. The main reason people do vaccinate is because, one they do not know any better, & two they are bullied by the media, Big Pharma, & their Dr's. There is no one size fits all with vaccines. As an American Citizen it is my right to choose what I put in my body & my childrens until they are 18. This Bill is the snowball just starting to roll downhill. The next will not let you opt out. We should not be put in a registry. That is unjust! The CDC now requires 72 doses compared to 24 in the 80's. 72 is an unrealistic number of recommend vaccines. Why is Autism & Sids at an all time high. Can it be related to to 72 doses?? Lastly,
There's no worse tyranny than to force a person to pay for something that they do not want merely because you think that it would be good for them.

would even acknowledge that my son had a problem that needed to be evaluated. Finally, between 4-4 1/2 yrs old, he was evaluated and confirmed autistic.

I cannot put a \$ amount on what we have spent on Jaxon over the past 15 years. It has cost my son a lifetime of loss, sadness, gain, and constant challenge. We have experienced, as a family of 8, relational, emotional, financial destruction because of Jaxon being vaccine damaged. His damage is long term and has stolen his opportunities to live a rewarding and purpose driven life. Currently, at the age of 19, he is greatly struggling to find a way to move forward and have a productive career, develop relationships outside of family, and have a life like the rest of his siblings. IT IS HEARTBREAKING to us ALL! We had used all available helps and spent 100's of 1,000's of \$s to our own hurt and no help for my son's life.

Vaccines DO CAUSE AUTISM for SOME!

It happened to MY CHILD, not a "rare few", but one of many I have met who have similar stories. The health dept. does not want to acknowledge it as truth, bc the cost would bankrupt this nation if reparations were given to those who have children damaged for life. Thank you for reading a small picture of my story.

HOUSE WRITTEN TESTIMONY SHEET

FOR: _____ AGAINST:

WRITTEN TESTIMONY:

Please see attached.

Gayle Sanford
OPPOSE HB 19-1312

Please vote NO on HB 19-1312.
I am an RN in Colorado.
In the medical field we make decisions based on risk vs. benefit.
~~I want to address risk vs. benefit.~~
While I understand the benefit of vaccines, I feel that the known risks outweigh the potential benefits for my own children. Much of the controlled studies for vaccines have been conducted with adults. There is a lack of double blind-placebo studies proving the safety of vaccines.
I would like to preserve my right to choose to not vaccinate my children based on my own research without being made to sign a form that could

be worded in a way that makes me consent to the fact that I am being neglectful or knowingly endangering my child, when in fact I am choosing to avoid known risks associated with vaccines.

I want to point out an article

www.ncbi.nlm.nih.gov/pubmed/8053748

This research article concludes: "The apparent paradox is that as measles immunization rates rise to high levels in a population, measles becomes a disease of immunized persons." Measles outbreaks are occurring even in situations where vaccine rates are high.

Thank you for taking the time to read my testimony.

I'm opposed to this bill for many reasons. If this bill gets passed the way it's written, I will be compelled to leave the state with my children. I'm literally a medical refugee from California. Throughout the bill, the word immunization is used synonymously with vaccination. They are overlapping terms. Immunization does not always follow vaccination. There have been numerous accounts of primary vaccine failure - failure to mount a protective immune response, as well as secondary vaccine failure - the gradual waning of the effect over time.

Besides that, there have been multiple disease outbreaks such as mumps, in which majority, if not all, of affected, had been vaccinated. Also, the pertussis vaccine has been shown to have the potential to spread from recently vaccinated individuals.

Section 1A, line 3, the amount of money this bill claims that vaccines save every year is very misleading. It doesn't take into account money paid out to vaccine injured children, as well as money spent on medical care for illnesses that may also be vaccine induced but have been not recognized by the vaccine court.

It also doesn't take into account that most of these communicable diseases were redefined in stricter, more specific terms right after begin of vaccination for that particular disease, and thus the efficacy rates are skewed in favor of vaccination.

Section 3 (II) A, page 6 line 25/26. It requires the parent/guardian to submit a standardized form - I am absolutely opposed to this. If it is in any way similar to the form available today, it is very incriminating, and filled with incorrect/incomplete information. I have included a copy of the current form, highlighted the points I disagree with. Here are my corresponding footnotes:

1. The form claims that vaccines are one of the greatest public health achievements of the past century. The childhood diseases were no longer considered deadly before introduction of vaccines due to plumbing, sanitation, hygiene and better nutrition. Going through the natural course of measles, mumps, rubella, chickenpox diminishes the chance of having cancer later in life.
2. Vaccines are not tested against true placebos. I have provided a list of link to vaccine inserts (I did not have the resources to print the inserts, sorry). You can verify, for every vaccine on the list, the "control" group either received another vaccine or some of the adjuvants and ingredients in the vaccine. Also, the ingredients in the vaccines have not been tested for safety injection. Section 13.1 for each of these inserts states that the vaccine has not been tested for its carcinogenic properties.
So, estimating that 3 million lives are saved every year from vaccines is based on the belief that vaccines are good. There is no factual science to support this.
3. Again, as the previous point. Yes, vaccines have been shown to prevent the diseases in most, for some time. But this statement is not acknowledging all the serious vaccine injuries, and death that can also be caused by vaccination.
4. "the benefits of preventing disease with a vaccine far outweighs the risks." We do not have double blind randomized controlled trials for vaccines. We have no comprehensive fully vaccinated vs nonvaccinated study for our current schedule, or, any schedule. I have included a pilot study of US 6 - 12 year old children, comparing their general health outcomes. The non vaccinated group did contract more communicable diseases, but were healthier overall in every other way. I have highlighted some interesting differences for you to glance at.

5. Declining the vaccine schedule “may endanger an unvaccinated child’s health and others who come into contact with him/her.” No. Based on my previous points, keeping my child unvaccinated is by far the less dangerous route for health to take. If any child is sick, they should be kept at home until recovered. This stands for all, vaccinated or not.
6. The information provided on these pages is very limited. The form does not inform of the risks of vaccination.

Forcing me to sign it in order to have kids attend in school is coercion, and I would be signing it under duress.

It seems to honor personal belief as well as religious exemption, but only if you let your child’s info go into a tracking system.

Section 3 (II) , Page 5 line 24. Concerning medical exemptions, it takes away the doctor’s authority to give one, because ACIP’s acknowledgment of contraindication is so limited, even more than the CDC guidelines.

This bill is guaranteed to drive up personal belief as well as religious exemptions, because there will be vaccines added. Also, many the medical exemptions currently in place will no longer be valid as autoimmune issues, family history of vaccine injury and many more will not be recognized per ACIP guidelines.

How much money will have to be spent on this schooling, or re-education? This bill is attempting to “educate” many parents of children, many of whom have vaccine injured/killed children. A decision to not vaccinate is not taken lightly. This program will be a waste of money, time and effort. People who choose not to vaccinate have already made up their mind. No “schooling” will undo what I have learned through reading numerous books and studies, as well as my own observation of vaccinated and nonvaccinated childrens’ health.

Until we are provided with an actual fully vaccinated vs non vaccinated comparison with long term health outcomes, the mantra vaccines are “safe and effective” is dubious at best. Until the NCVIA of 1986, which shields manufacturers from liability, gets repealed, we won’t know the true rate of adverse reactions to vaccines. I find it unethical to pass legislation that steps in direction of vaccine mandates (see California. This bill is similar to AB2109. Then SB77. and now SB276), providing only part of the information, knowing that under 1% of adverse reactions are ever reported to VAERS, knowing that the pharmaceutical companies that make these products, have no liability, do not test the vaccines for safety of injection versus actual inert placebo.

Thank you for reading my testimony.

Again, I urge you to please vote no on HB19-1312. We all want to act in the best interest for our children, and we all try our best to provide them with a healthy and safe environment.

WRITTEN TESTIMONY:

Representatives,

I am the father of a four-week old newborn who cannot be vaccinated (per the vaccine manufacturer's own contraindication list for the mMR vaccine, which very clearly states that individuals with family history of immune system disorders ^{or previous vaccine reactions,} are contraindicated).

My brother was born perfectly healthy w/ perfect APGAR scores, then developed vaccine-induced Tourette's Syndrome / phonic + motor tics, which has permanently changed his life. Recently, he began self-harming his body, directly related to his severe anxiety stemming from his Tourette's. Under this bill, my brother would not ever be allowed a medical exemption.

It is my responsibility to protect my child, and for this reason alone, he will never be vaccinated, even if this requires ~~my~~ my husband + son + myself to leave this great state.

Please oppose this disastrous bill!

I Wish They Never Vaccinated Me

It was the beginning of Kindergarten and I recently got my shots. I was playing outdoors when suddenly my mind stopped. All I seen was black, I could not awake, when finally, I seen the teacher, she asked if I was okay. She had me on a table and tears ran down her cheek, she looked very scared, I couldn't remember a thing, what happened in that moment, I was so confused, all my classmates didn't know what to do. Another person walked in and asked questions, my teacher answered I think she had a seizure and hit her head on that heater.

As time went by, I had a learning disability, asthma, surgeries, and severe allergies. I would faint after shots and wake up with knots, on my head from fainting and falling to the floor. The doctors said it was normal, but I knew it wasn't, why was it every time I seen a doctor, my health became worse, problems after problems, my health went off course..... I wish they never vaccinated me.

I had my first daughter and I feared for her life, I wanted so badly to do everything right. I listened to the doctors and followed the schedule. I was hesitant though, for the last shots on the schedule. Those were the shots that mentally left me a scar. I told them no but they said many measles breakouts are not too far. I wasn't as educated as I am now. I thought she would die, if I didn't get them now. They were aware of what happened to me, they said my daughter would be okay, they guarantee. When we got home from the doctor that day. She couldn't stop itching and then rashes would stay. For weeks her body was covered in bumps. Doctors said eczema was her diagnose; her body was covered from head to toe. She never had issues, not ever before, but now her skin and gut doesn't work like before. I tried to get a lawyer, but they said I couldn't sue, in 1986 a law was singed you cannot pursue, only taxpayers pay so there's no liability, from the
