## **Committee Charge**

Pursuant to Senate Bill 13-082, the Wildfire Matters Review Committee is charged with reviewing and proposing legislation or other policy changes related to wildfire prevention, mitigation, and related matters, including public safety and forest health issues. In addition, the bill transferred to the committee any remaining powers, duties, and responsibilities delegated to the Lower North Fork Wildfire Commission by House Bill 12-1352. In passing SB 13-082, the General Assembly intended for the Wildfire Matters Review Committee to be a permanent interim committee through which the General Assembly reviews state policies and resources addressing wildfire prevention and mitigation and the successful implementation and execution of such policies; the committee sunsets on July 1, 2018.

## **Committee Activities**

The committee met four times during the 2015 interim. At all four meetings, the committee heard presentations from, and engaged in discussion with, representatives of various entities involved in wildfire prevention, mitigation, and response. These presentations and discussions covered a wide range of topics associated with wildfires, including efforts undertaken by the General Assembly to address wildfire issues in recent years; forest health; homeowner's insurance in the wildland-urban interface; funding needs for various wildfire mitigation and response initiatives, including federal funding; the status of the timber and biomass industries; prescribed burning; wildfire behavior predictability; forest and watershed restoration; stakeholder legislative recommendations; auxiliary emergency communications; and wildfire preparedness efforts undertaken by local governments. Entities represented before the committee included:

- the Department of Public Safety;
- the Division of Fire Prevention and Control;
- the Division of Homeland Security and Emergency Management;
- the Nature Conservancy;
- Colorado State Fire Chiefs;
- County Sheriffs of Colorado;
- the Amateur Radio Relay League;
- the Colorado Department of Public Health and Environment;
- the Colorado Department of Natural Resources;
- the Colorado Emergency Management Association;
- the United States Forest Service;
- the Colorado State Forest Service;
- representatives of the timber and biomass industries;
- forest and watershed health experts;
- the Colorado Municipal League; and
- local governments.

The committee heard public testimony at all four of its meetings, and spent time during meetings undertaking organizational activities and considering draft legislation. Six bills, two resolutions, and one letter were drafted at the request of the committee, which ultimately approved four bills, one resolution, and one memorial. Topics covered and recommendations made by the committee are discussed below.

## **Radio Communication Systems**

---

**Radio and auxiliary communications during emergencies.** The committee heard from representatives of the Amateur Radio Relay League's Amateur Radio Emergency Service for the state of Colorado and discussed the role of volunteer amateur radio operators during wildfire emergencies. Bill D, which incorporates the topics discussed by the committee, creates the Auxiliary Emergency Communications Unit (unit) within the Office of Emergency Management in the Division of Homeland Security and Emergency Management (DHSEM) in the Colorado Department of Public Safety (DPS).

The committee also discussed the communication needs during a wildfire emergency, including coverage, funding, consolidated governance, interoperability, and proper training. A draft letter to the DPS regarding a study to find feasible alternatives to radio communications during wildfire events in rural areas was discussed by the committee, but did not go forward.

**Interoperable communication systems.** The committee heard from the DHSEM regarding public safety communication needs in Colorado. Specifically, the committee discussed the Statewide Needs Assessment and Business Plan report on the interoperable communication systems in Colorado used for emergency management and other purposes. Examples of interoperable communication systems utilized in Colorado include:

- digital trunked radio system;
- Front Range Communications Consortium;
- Pikes Peak Regional Communication Network; and
- amateur radio emergency services.

Additional interoperable communication systems may be used in various areas of the state. The DHSEM discussed the coverage range of the current systems and the risks associated with no-coverage zones.

## **Forest Health and Timber Industries**

---

**Forest health and watershed restoration.** The committee heard from the Colorado State Forest Service (CSFS), the Nature Conservancy, timber and biomass industry experts, and forest researchers regarding the health of Colorado's forests. Specifically, the density of forests due to the lack of naturally occurring wildfires and lack of proper fire mitigation has increased the severity and dangers associated with wildfires in some areas. The committee discussed the wildfire risk reduction programs administered by the state.

In addition, the committee heard from representatives of water conservation districts on the impact of wildfires on watershed health. Proper forest management and wildfire mitigation efforts can also be used to protect watershed health. Based on the topics covered during this discussion, the committee recommended two bills. Bill B adds broadcast burning to the types of methods that may be awarded grants from the Healthy Forests and Vibrant Communities Cash

Fund and the Forest Restoration Program Cash Fund. Bill C also adds broadcast burning to the types of projects and methods for which the Department of Natural Resources may award grants from the Wildfire Risk Reduction Fund.

**Forest health related to beetle kill and wildfire risks.** The CSFS provided information on the current health of Colorado's forests. In addition, the committee discussed the mitigation programs available to communities and private land owners in forested areas at high risk for wildfire activity.

In addition, studies from the University of Colorado and Colorado State University were discussed. Specifically, these studies found that forest restoration works differently depending on the forest type, environment, and elevation. The committee discussed the potential impacts of beetle-killed trees on wildfire activity.

**Timber and biomass industries.** The committee heard from representatives of forest utilization industries and discussed the timber and biomass industries in Colorado. Specifically, they discussed how private industries can be used to clear and mitigate dense forests in order to reduce wildfire risk. In addition, representatives from biomass industries talked about the types of technologies used to create alternative energy sources in rural areas.

## **Firefighter Safety**

---

**Firefighter safety and recognition of work.** The committee heard from the Division of Fire Prevention and Control and the Colorado Department of Public Health and Environment (CDPHE) on health and safety concerns related to wildfires. A representative from CDPHE discussed air quality and health issues related to smoke. In addition, the committee discussed methods and resources for protecting the public and emergency responders, which includes efforts to reduce the risks and severity of wildfire activities. The committee discussed, but did not approve a bill that would have clarified terms related to the criminal offense of obstructing a peace officer, firefighter, or other emergency response personnel, and would have transferred or diverted state revenue to firefighter safety and wildfire risk reduction programs.

The committee also discussed the sacrifices made by firefighters during emergency responses. Resolution A honors and recognizes firefighters that have been killed in the line of duty.

## **Local Wildfire Issues**

---

**Local government authority in wildfire mitigation and suppression.** The committee heard from the County Sheriffs of Colorado, the Colorado Municipal League (CML), and local government representatives on issues related to wildfire mitigation and suppression. Specifically, the committee discussed the potential risks to private property in WUI areas. County representatives spoke on building codes and zoning issues related to new and existing developments in WUI areas.

In addition, CML presented on the various mitigation programs available to municipal governments, including Community Wildfire Protection Plans, Firewise Communities, and Fire Adapted Communities.

***Wildfire risks in the wildland-urban interface areas.*** The committee addressed issues regarding forest management in low-elevation areas and the need to mitigate wildfire risks in the wildland-urban interface (WUI) areas. Representatives from local governments discussed the issues in communities and developments in the WUI areas. Based on the topics covered during this discussion, the committee discussed two bills. Bill A eliminates the wildfire mitigation income tax deduction and creates a wildfire mitigation state income tax credit. Another bill that would have required counties and municipalities that have adopted a building code to also adopt and enforce a wildfire mitigation code was ultimately not approved by the committee.

## **Federal Wildfire Issues**

---

***Federal support for wildfire suppression.*** The committee heard from representatives of the U.S. Forest Service regarding the federal government's role in wildfire suppression. The committee discussed the current federal funding for wildfire suppression and mitigation. In response to these concerns, Memorial B asks Congress to fund the costs for catastrophic wildfire response outside the normal budgets for federal forest management agencies.

## Summary of Recommendations

As a result of committee discussion and deliberation, the Wildfire Matters Review Committee recommends the following four bills, resolution, and memorial for consideration in the 2016 legislative session:

### **Bill A — Change the Wildfire Mitigation Tax Deduction to a Credit**

Bill A eliminates the wildfire mitigation income tax deduction and creates a wildfire mitigation state income tax credit. The tax credit will be available for tax years 2017 through 2019. The amount of the credit is equal to 25 percent of the costs a landowner incurs performing wildfire mitigation on his or her property located in the WUI. The amount of the credit per tax year cannot exceed \$2,500. Any amount above the limit can be carried forward for five years. Any remaining credit after five years is nonrefundable.

### **Bill B — Use Broadcast Burns to Promote Watershed Restoration**

Bill B adds broadcast burning to the types of projects and methods for which the CSFS may award grants from the Healthy Forests and Vibrant Communities Cash Fund and the Forest Restoration Program Cash Fund.

### **Bill C — Broadcast Burns to Wildfire Risk Reduction Grant Program and Replenish Fund**

Bill C adds broadcast burning to the types of projects and methods for which the Department of Natural Resources may award grants from the Wildfire Risk Reduction Fund, and authorizes the transfer of a total of \$3.0 million into the cash fund: \$1.5 million from the General Fund and \$1.5 million from the Severance Tax Operational Fund.

### **Bill D — Auxiliary Emergency Communication**

Bill D creates the Auxiliary Emergency Communications Unit (unit) within the Office of Emergency Management in the DHSEM in the DPS. The unit has the power to:

- establish programs for the training and credentialing of auxiliary emergency or disaster communicators across the state;
- assume all the duties and responsibilities of the Radio Amateur Civil Emergency Service (RACES); and
- ensure that auxiliary emergency communicators are authorized volunteers entitled to the appropriate protections and benefits of emergency volunteers when assisting local governments with the maintenance or demolition of communication facilities.

Pursuant to this authority, the DPS may develop and issue photo identification cards to auxiliary communicators, conduct criminal background checks, and reimburse emergency communicators for necessary travel and other expenses incurred in performance of their duties.

Finally, the bill increases from 23 to 24 the number of members serving on the Public Safety Communications Subcommittee of the Homeland Security and All-Hazards Senior Advisory

Committee in the DPS. The additional member is the section emergency coordinator for the Amateur Radio Emergency Service of the Colorado section of the Amateur Radio Relay League.

**Resolution A — Recognizing Firefighters Killed in the Line of Duty**

The resolution honors and recognizes firefighters that have been killed in the line of duty.

**Memorial B — Federal Budgets for Catastrophic Wildfire Response**

The memorial requests that Congress fund the costs for catastrophic wildfire response outside the normal budgets for federal forest management agencies.

a taxpayer's tax liability by taking a dollar-for-dollar reduction in what is owed by what the credit allows. The bill allows a landowner a credit of 25% of the costs incurred in performing wildfire mitigation measures, not to exceed \$2,500. Any amount in excess of the landowner's tax liability in the year the credit is first claimed may be carried forward to offset the landowner's future tax liability for 5 years.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2           **SECTION 1. Legislative declaration.** (1) The general assembly  
3 hereby finds and declares that:

4           (a) Warm winters, hot and dry summers, severe drought, insect  
5 and disease infestations, years of fire suppression, and population growth  
6 in the wildland-urban interface continue to increase wildfire risk and the  
7 potential for catastrophic wildland fires in Colorado;

8           (b) Mitigating wildfire risk by creating a defensible space around  
9 structures is imperative not only to the home and the homeowner, but also  
10 to the homeowner's community and to the safety of the firefighters called  
11 to defend a home from a wildfire;

12           (c) By creating an adequate defensible space around structures, a  
13 homeowner can give firefighters the safest and best chance to defend the  
14 home from a wildfire; and

15           (d) Offering an income tax credit to a taxpayer for a portion of the  
16 costs of wildfire mitigation measures that the taxpayer incurs is sound  
17 public policy.

18           **SECTION 2.** In Colorado Revised Statutes, 39-22-104, **amend**  
19 (4) (n.5) (I) (A) and (4) (n.5) (IV) as follows:

20           **39-22-104. Income tax imposed on individuals, estates, and**  
21 **trusts - single rate - definitions - repeal.** (4) There shall be subtracted  
22 from federal taxable income:

1 (n.5) (I) (A) For income tax years commencing on or after January  
2 1, 2014, but prior to ~~January 1, 2025~~ JANUARY 1, 2017, an amount equal  
3 to fifty percent of a landowner's costs incurred in performing wildfire  
4 mitigation measures in that income tax year on his or her property located  
5 within the state; except that the amount of the deduction claimed in an  
6 income tax year shall not exceed two thousand five hundred dollars or the  
7 total amount of the landowner's federal taxable income for the income tax  
8 year for which the deduction is claimed, whichever is less.

9 (IV) This paragraph (n.5) is repealed, effective ~~January 1, 2026~~  
10 JANUARY 1, 2018.

11 **SECTION 3.** In Colorado Revised Statutes, **add** 39-22-538 as  
12 follows:

13 **39-22-538. Credit for wildfire mitigation - definitions - repeal.**

24 (2) IF THE AMOUNT OF THE CREDIT ALLOWED IN THIS SECTION  
25 EXCEEDS THE AMOUNT OF INCOME TAXES OTHERWISE DUE ON THE  
26 TAXPAYER'S INCOME IN THE INCOME TAX YEAR FOR WHICH THE CREDIT IS  
27 BEING CLAIMED, THE AMOUNT OF THE CREDIT NOT USED AS AN OFFSET

1 AGAINST INCOME TAXES IN THE CURRENT INCOME TAX YEAR MAY BE  
2 CARRIED FORWARD AND USED AS A CREDIT AGAINST SUBSEQUENT YEARS'  
3 INCOME TAX LIABILITY FOR A PERIOD NOT TO EXCEED FIVE YEARS AND  
4 SHALL BE APPLIED FIRST TO THE EARLIEST INCOME TAX YEARS POSSIBLE.  
5 ANY CREDIT REMAINING AFTER SAID PERIOD SHALL NOT BE REFUNDED OR

*(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://www.leg.state.co.us/billsummaries>.)*

Shading denotes HOUSE amendment. Double underlining denotes SENATE amendment.  
*Capital letters indicate new material to be added to existing statute.*  
*Dashes through the words indicate deletions from existing statute.*

**Wildfire Matters Review Committee. Section 1** of the bill contains a nonstatutory legislative declaration.

**Section 2** of the bill creates the auxiliary emergency communications unit (unit) within the office of emergency management (office) within the division of homeland security and emergency management in the department of public safety. The unit is in the charge of the director of the office. This section specifies the unit's powers and duties and additionally specifies the powers and duties of the director of the office in connection with the powers and duties of the unit.

**Sections 3 through 7** of the bill make modifications to existing statutory provisions governing compensation benefits to volunteer civil defense workers. Specifically:

- Section 3 of the bill expands the definition of "emergency volunteer service" to include activities undertaken during a training exercise, drill, or class conducted in preparation for a disaster if the exercise, drill, or class is organized or under the direction of the county sheriff, local government, local emergency planning committee, or state agency;
- Section 4 of the bill specifies that any credentialed member of the unit is a qualified volunteer and is eligible to receive accompanying protections and benefits under existing statutory provisions;
- Section 5 of the bill includes the amateur radio emergency service as a specified volunteer organization authorized to provide emergency services to state and local agencies. This section of the bill also specifies that the amateur radio emergency service is a qualified volunteer.
- Section 6 of the bill expands the activities for which a qualified volunteer may be called to service to include a training exercise, drill, or class conducted in preparation for a disaster if the exercise, drill, or class is organized or under the direction of the county sheriff, local government, local emergency planning committee, or state agency. The statutory provisions protecting qualified volunteers do not apply to a training exercise, drill, or class without the express prior consent and approval of the volunteer's employer.
- Section 7 of the bill expands the list of activities used to verify that a qualified volunteer provided volunteer services to include an organized training exercise, drill, or class.

**Section 8** of the bill increases the size of the public safety communications subcommittee to the homeland security and all-hazards senior advisory committee from 23 to 24 members and makes the section emergency coordinator for the amateur radio emergency service of the

Colorado section of the amateur radio relay league or his or her designee a standing member of the subcommittee.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly  
3 hereby finds, determines, and declares that:

4 (a) Amateur radio operators have served their communities, the  
5 state, and the nation for over seventy-five years providing emergency and  
6 disaster communications;

7 (b) Following World War II, the federal government recognized  
8 the need for trained radio operators to assist with civil defense in the  
9 event of war and created a branch within the amateur radio service, the  
10 Radio Amateur Civil Emergency Service (RACES);

11 (c) The American Radio Relay League, the national association  
12 for radio amateurs, created the Amateur Radio Emergency Service  
13 (ARES) in 1935 and, since that time, ARES has been the only national  
14 organization recruiting and training amateur radio operators to serve in  
15 times of emergency;

16 (d) ARES is well established and well organized within Colorado;

17 (e) In many communities ARES and RACES units were combined  
18 with ARES members assuming the role of RACES operators when local  
19 emergencies were declared. In other communities, separate ARES and  
20 RACES organizations were established, thereby diluting the available  
21 resources and creating confusion or conflict as to roles and  
22 responsibilities.

23 (f) Communication failures have been a defining element of  
24 recent disasters, both natural and manmade;

25 (g) The September 11, 2001, attacks on the World Trade Center

1 in New York City, Hurricane Katrina, the 2003 North American blackout,  
2 and Hurricane Sandy in 2012 were all disasters where amateur radio  
3 provided key communication links when other communication facilities  
4 failed;

5 (h) The United States congress recognized the importance of  
6 amateur radio communications as a part of the national disaster response  
7 framework in 2012 when it directed the Federal Communications  
8 Commission (FCC) to conduct a study on the uses and capabilities of  
9 amateur radio service communications in emergencies and disaster relief;

10 (i) The FCC report, GN docket no. 12-91 dated August 16, 2012,  
11 concluded that "amateur radio can be of great value in emergency  
12 response situations. Amateur radio carries with it a wide range of  
13 advantages that allow it to supplement other emergency communications  
14 activities during disasters. This has been demonstrated time and again in  
15 a wide variety of emergency and disaster situations."

16 (j) The FCC report acknowledged that the "value [of amateur  
17 radio] could potentially be increased, however, through cooperation  
18 among DHS [the United States department of homeland security], public  
19 safety, emergency management, and amateur radio communications  
20 associations and groups to develop future training protocols." The FCC  
21 recommended to congress that DHS work with state, local, and tribal  
22 authorities to develop disaster area access policies and qualifications for  
23 trained amateur radio operators who provide emergency communications  
24 support.

25 (k) In Colorado, amateur radio operators and, in particular, ARES  
26 members have a rich history of providing communication expertise during  
27 natural or man-made disasters such as the blizzards of December 2006;

1 the Hayman, North Fork, Four Mile Canyon, High Park, Waldo Canyon,  
2 and Black Forest wildfires; and the September 2013 floods;

3 (l) Today, amateur radio operators assist the division of homeland  
4 security and emergency management of the department of public safety;  
5 train side-by-side with their professional counterparts in federal, state,  
6 and local government entities; and serve as members of local and regional  
7 incident management teams;

8 (m) In recent years amateur radio operators have been called upon  
9 by state and local governments to act as communication experts across a  
10 broader range of duties and responsibilities that extend beyond traditional  
11 amateur radio communication;

12 (n) While maintaining their traditional roles as amateur radio  
13 operators, many of these volunteers assist with the establishment and  
14 maintenance of communication facilities, assist with programming public  
15 safety radios during emergencies, and act as radio operators on public  
16 safety channels;

17 (o) During the past year, amateur radio operators have performed  
18 tens of thousands of hours of devoted service to the people of Colorado;

19 (p) While ARES has worked closely and cooperatively with the  
20 office of emergency management in the division of homeland security and  
21 emergency management, it has done so in a largely informal manner,  
22 lacking a formal memorandum of understanding between it and the  
23 office;

24 (q) Emergency preparedness and disaster response across the state  
25 would be improved by a comprehensive integrated and unified  
26 communications response framework;

27 (r) The office of emergency communications of the United States

1 department of homeland security (OEC) has provided direct technical  
2 assistance to state and local emergency responders and government  
3 officials through the development and delivery of training, tools, and  
4 onsite assistance to advance public safety interoperable communications  
5 capabilities; and

6 (s) The concept of auxiliary emergency communications  
7 (auxcomm) is being deployed nationally under the sponsorship of the  
8 OEC, and the framework has been embraced by the office of emergency  
9 management.

10 (2) Having a uniformly trained and credentialed unit of  
11 communication volunteers available for disaster response will materially  
12 assist emergency preparedness and disaster response efforts across the  
13 state. Accordingly, the general assembly hereby finds, declares, and  
14 determines that the matters addressed in this act are a matter of statewide  
15 concern.

16 (3) By enacting House Bill 16-\_\_\_\_, the general assembly intends  
17 to establish the auxiliary emergency communications unit within the  
18 office of emergency management in the division of homeland security and  
19 emergency management of the department of public safety as an  
20 all-volunteer, unpaid auxiliary unit for the purpose of lending technical  
21 and communication assistance to emergency management, firefighting,  
22 emergency medical service, search-and-rescue, and law enforcement  
23 agencies across the state. The general assembly further intends that the act  
24 be liberally construed to promote these objectives.

25 **SECTION 2.** In Colorado Revised Statutes, **add** 24-33.5-705.5  
26 as follows:

27 **24-33.5-705.5. Auxiliary emergency communications unit -**

1             WHEREAS, There are about 24 million acres of forests and  
2 woodlands in Colorado, of which more than two-thirds are managed by  
3 the federal government; and

4             WHEREAS, Colorado's forests are increasingly susceptible to  
5 forest fires, with an average of about 40,000 acres burned per year from  
6 2004 through 2007 but an average of more than 140,000 acres burned per  
7 year from 2008 through 2014; and

8             WHEREAS, According to the Insurance Information Institute,  
9 Colorado has the second highest percentage of households that are at high  
10 or extreme risk from wildfires of any state in the nation; and

11            WHEREAS, Under current federal law, money that was originally  
12 budgeted to mitigate fire risk, protect and restore watersheds, increase  
13 forest health, promote recreational opportunities, and conduct necessary  
14 forest planning is diverted to fight fires once the amount budgeted for fire  
15 fighting has been depleted; and

16            WHEREAS, The United States Forest Service spent only 16% of  
17 its annual budget on fire suppression and response in 1995, but recently  
18 announced that in 2015, for the first time, it will spend more than half its

1 budget to fight wildfires, and by 2025 it expects to spend 67% of its  
2 budget on that task; and

3 WHEREAS, A 2013 study by Headwaters Economics showed that  
4 in the 1990s, average federal spending to suppress wildfires was less than  
5 \$1 billion annually, but since 2002, federal spending has risen to over \$3  
6 billion annually and costs are still rising; and

7 WHEREAS, Paying for catastrophic wildfire response should not  
8 come at the expense of programs that reduce the risk of wildfires, because  
9 doing so plainly creates a feedback loop that increases the frequency and  
10 severity of catastrophic wildfires; and

11 WHEREAS, Congress is currently considering several measures  
12 that would create alternative ways to pay for catastrophic wildfire  
13 response costs; and

14 WHEREAS, The General Assembly's Water Resources Review  
15 Committee and Wildfire Matters Review Committee have approved this  
16 Joint Resolution [Memorial]; now, therefore,

17 *Be It Resolved by the Senate of the Seventieth General Assembly*  
18 *of the State of Colorado, the House concurring herein:*

19 That Congress should enact laws necessary to protect federal land  
20 management agencies' ability to mitigate the risk of catastrophic wildfires  
21 and manage the lands within their jurisdiction by funding catastrophic  
22 wildfire response in a manner analogous to that used for natural disasters.

23 *Be It Further Resolved*, That a copy of this Joint Memorial be  
24 provided to Colorado's congressional delegation, Governor John  
25 Hickenlooper, the Western Governors' Association, Secretary of  
26 Agriculture Tom Vilsack, and Secretary of the Interior Sally Jewell.
