a new statewide human resources information system (system), with the target "go live" date of July 1, 2017. It is likely that many of the potential findings of the audit will already be corrected with the new system, so conducting the audit just prior to the implementation of the new system would not be the most efficient use of resources. In addition, the most recent audits of the department and the board have not found areas of high risk or significant new cost savings for the department or the board.

The bill changes the date on which the next audit of the department and the board is due to December 1, 2019, which is after the implementation of the new system. The bill also removes the 4-year audit requirement and leaves future audits to the discretion of the state auditor.
