Current Appropriations Clause in Bill

The bill includes an appropriations clause that provides \$5,289 cash funds from the Department of State Cash Fund to the Department of State for FY 2016-17. This provision also indicates that the appropriation is based on the assumption that the Department will require an additional 0.1 FTE to implement the bill.

Points to Consider

TABOR/Excess State Revenues Impact

With the exception of a small amount of federal funding, the Department of State is entirely supported by cash funds revenue from fees for business filings and other licencing and registration

programs. Pursuant to Section 24-21-104, C.R.S., the Department is authorized to adjust fees so revenue approximates the Department's direct and indirect costs. This individual bill may not necessitate a fee increase on its own, but it would contribute to overall expenditures from the Department of State Cash Fund. If the Department of State needed to implement a fee increase to ensure there was sufficient revenue to support all required expenditures, this bill would contribute to that increase and thus to anticipated refunds under TABOR, reducing the amount of General Fund available for other purposes.

Please note, the TABOR considerations described above only apply to expenditures from the Department of State Cash Fund required by this bill. The bill also establishes the Electronic Recording Technology Fund, which is continuously-appropriated to the Electronic Recording Technology Board. The Board is designated as an enterprise, which exempts it from TABOR. As a result, the cash fund revenue generated by this portion of the bill would not have an impact on anticipated TABOR refunds or available General Fund.
