pharmacies as follows:

- Requires a health insurer to submit to the commissioner of insurance (commissioner) a list of PBMs the health insurer uses to manage or administer prescription drug benefits under its health benefit plans offered in this state;
- Prohibits PBMs from:
 - Restricting a covered person's access to prescription drug benefits at an in-network retail pharmacy, except as permitted in limited circumstances;
 - Charging a pharmacy or pharmacist a fee for adjudicating a claim, other than a one-time fee of not more than the lesser of 25% of the pharmacy dispensing fee or 25 cents for receipt and processing of the same pharmacy claim;
 - Requiring stricter pharmacy accreditation standards or certification requirements than the standards or requirements that are applicable to similarly situated PBM-affiliated pharmacies within the same PBM network; or
 - Refusing to designate a pharmacy located in a county with a population of 20,000 or fewer as a preferred pharmacy under the health benefit plan.

A PBM that administers the drug assistance program operated by the department of public health and environment is exempt from the requirements and prohibitions of the act with regard to the PBM's administration of that program only.

The bill also:

- Requires a health insurer or PBM to respond in real time to a request from an insured, the insured's health care provider, or a third party acting on behalf of the insured or provider for data regarding the cost, benefits, and coverage under the insured's health benefit plan for a particular drug; and
- Requires a health insurer or PBM that removes a prescription drug from the prescription drug formulary or moves a prescription drug to a higher cost tier on the formulary during the benefit year to notify a covered person that is prescribed that drug at least 30 days before the action and allow the covered person to continue using the drug without prior authorization and at the same coverage level for the remainder of the benefit year, except in specified circumstances.

1 **SECTION 1. Legislative declaration.** (1) The general assembly
2 finds that:

3 (a) Pharmacies are vital community resources, with local
4 pharmacies often serving as the only source of health information and
5 care for many patients;

6 (b) Pharmacies and pharmacists are particularly important in rural
7 communities, where residents may lack access to other regular health
8 care;

9 (c) Moreover, many pharmacists are authorized to dispense and
10 administer routine vaccinations and will play a critical role in distributing
11 the COVID-19 vaccine;

12 (d) Pharmacy benefit managers (PBMs) function as
13 claims-processing intermediaries between health insurers or plans and
14 pharmacies, and as administrators of the financial and logistical aspects
15 of claims processing, PBMs can serve a valuable purpose;

16 (e) By establishing infrastructure and centralizing processing,
17 PBMs can streamline services, realize efficiencies, and potentially reduce
18 system costs across the board, and by amassing large patient networks,
19 PBMs can gain leverage to negotiate discounts for the ultimate benefit of
20 the patient;

21 (f) When patients are left without a trusted pharmacy, they are
22 alone to navigate a confusing and unpredictable prescription drug benefits
23 system that includes barriers to medication access from diagnosis to
24 prescription pickup, such as impersonal technology and benefit
25 complications; and

26 (g) Access to prescription drugs needs to be fair, predictable, easy,
27 and empowered by technologies that break down barriers to medication

1 access and improve the lives of patients.

2 (2) The general assembly declares that the intent of this act is to:

3 (a) Ensure that all Colorado pharmacies and their patients are
4 treated fairly and equitably;

5 (b) Preserve patient access to pharmacy services; and

6 (c) Ensure that:

7 (I) Pharmacists are fairly compensated for their services;

8 (II) Patients have access to affordable, life-saving medications;

9 and

10 (III) Transactions between PBMs, patients, and pharmacies are
11 transparent.
