law also sets forth procedures to certify a person for short-term or long-term care and treatment if the person has a mental health disorder, and as a result of the mental health disorder, is a danger to the person's self or others, or is gravely disabled. The bill modifies these procedures by:

- Transferring duties of the executive director of the department of human services to the commissioner (commissioner) of the behavioral health administration (BHA);
- Limiting who can take a person into protective custody and transport the person to an outpatient mental health facility, a facility designated by the commissioner of the BHA (designated facility), or an emergency medical services facility (EMS facility) if the person has probable cause to believe a person is experiencing a behavioral health crisis;
- Requiring the facility where the person is transported to require an application, in writing, stating the circumstances and specific facts under which the person's condition was called to the attention of a certified peace officer or emergency medical services provider;
- Requiring an intervening professional to screen the person immediately or within 8 hours after the person's arrival at the facility to determine if the person meets the criteria for an emergency mental health hold;
- Establishing certain rights for a person being transported, which must be explained prior to transporting the person;
- Requiring a petition for certification for long-term treatment and care to be filed with the court at least 30 days prior to the expiration of the extended certification and requiring the petition to include a recommendation as to whether the certification should take place on an inpatient or outpatient basis;
- Effective July 1, 2023:
 - Subjecting a person who files a malicious or false petition for an evaluation of a respondent to criminal prosecution;
 - Authorizing a certified peace officer to transport a person to an emergency medical services facility (EMS facility), even if a warrant has been issued for the person's arrest, if the certified peace officer believes it is in the best interest of the person;
 - Authorizing an intervening professional or certified peace officer to initiate an emergency mental health hold at the time of screening the respondent;
 - Authorizing a secure transportation provider to take

a respondent into custody and transport the person to an EMS facility or designated facility for an emergency mental health hold;

- Expanding the list of professionals who may terminate the emergency mental health hold;
- Requiring the evaluation to be completed using a standardized form approved by the commissioner;
- Expanding who can initiate a certification to include an advanced practice registered nurse with training in psychiatric nursing and prescriptive authority;
- Requiring an EMS facility to immediately notify the BHA if a person is evaluated and the evaluating professional determines that the person continues to meet the criteria for an emergency mental health hold and the initial emergency mental health hold is set to expire before an appropriate placement is located;
- Requiring the BHA to support the EMS facility in locating an appropriate placement option. If an appropriate placement option cannot be located, the bill authorizes the EMS facility to place the person under a second emergency mental health hold and requires the court to immediately appoint an attorney.
- Authorizing a designated facility to place the person under a second emergency mental health hold if the person has been recently transferred from an EMS facility to the designated facility and the designated facility is unable to complete the evaluation before the initial emergency mental health hold is set to expire; and
- Requiring the facility to provide the person with a discharge summary and a copy of the completed evaluation; facilitate a follow-up appointment within 7 calendar days after discharge; attempt to follow up with the person 48 hours after discharge; and encourage the person to designate a family member, friend, or lay person to participate in the person's discharge planning.
- Effective January 1, 2025:
 - Authorizing the court to certify a respondent for not more than 3 months for short-term treatment and place the respondent in the BHA's custody without the need for an emergency mental health hold upon a petition of certain individuals;
