children, youth, and family services grants to expand youth-oriented and family-oriented behavioral health-care services. A community-based organization, local government, or nonprofit organization is eligible for a grant award.

The BHA must develop a behavioral health-care services assessment tool that grant applicants can use to identify regional gaps in services on the behavioral health-care service continuum. In awarding grants, the BHA shall give preference to applicants providing a service that addresses a gap in services identified with the assessment tool.

In order to receive a grant, an applicant must submit an application and identify a source of contributing funds or nonfinancial contributing resources, such as in-kind contributions, that directly support the behavioral health-care services provided with the grant award.

Each grant recipient must report to the BHA information about the use of the grant award. The state department of human services must include information about the grant program in its annual "State Measurement for Accountable, Responsive, and Transparent (SMART) Government Act" hearing.

The bill appropriates \$90 million from the behavioral and mental health cash fund to the state department for the grant program.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 declares that it intends to further the goals declared by the behavioral
4 health transformational task force, established by the general assembly in
5 2021, which includes ensuring that:

6 (a) Those with the highest needs get the care they need when they
7 need it;

8 (b) People can access a behavioral health-care service when they
9 need it and as early in the continuum as possible;

10 (c) People with behavioral health-care needs are connected to
11 services across the behavioral health-care the continuum;

12 (d) Equitable, culturally responsive, inclusive, effective, and
13 high-quality services are available in all regions across Colorado;

14 (e) The state has a trained, qualified, and diverse workforce that

1 is sufficient to meet the needs of Coloradans; and

2 (f) There is integration and parity between physical and behavioral
3 health.

4 (2) The general assembly further finds and declares that:

5 (a) The federal government enacted the "American Rescue Plan
6 Act of 2021" (ARPA), Pub.L. 117-2, pursuant to which Colorado
7 received \$3,828,761,790 to mitigate the fiscal effects stemming from the
8 COVID-19 public health emergency;

9 (b) Government recipients of ARPA funds may use the funds to
10 provide resources for governments to meet the public health and
11 economic needs of those impacted by the pandemic in their communities.
12 Pursuant to ARPA and subsequent federal regulations, when providing
13 behavioral health-care services, government recipients may presume that
14 the general public was impacted by the pandemic, and they can therefore
15 use ARPA funds to provide a broad range of behavioral health-care
16 services to the public.

17 (c) The expenditures for the community behavioral health-care
18 continuum gap grant program, which provides grants for programs and
19 services along the behavioral health-care continuum, are considered an
20 allowable use under ARPA and are necessary to respond to the
21 COVID-19 public health emergency; and

22 (d) The behavioral health-care services and programs and funding
23 for behavioral health facilities and equipment described in this act are
24 important government services.
