Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://leg.colorado.gov>.)

The bill allows the department of transportation (department) to establish steep downhill grade zones within the public highways of the state where the downhill grade is 5% or greater and where there are safety concerns related to commercial motor vehicle drivers exceeding the posted speed limits.

Shading denotes HOUSE amendment. Double underlining denotes SENATE amendment.
Capital letters or bold & italic numbers indicate new material to be added to existing law.
Dashes through the words or numbers indicate deletions from existing law.

The bill subjects a commercial motor vehicle driver who commits a speeding violation in a steep downhill grade zone to doubled fines and surcharges. If the department establishes a steep downhill grade zone, the department must erect signs identifying the zone and notifying commercial motor vehicle drivers that increased fines are assessed for speeding in the zone.

The bill creates the mountain highways commercial motor vehicle safety account (account) within the highway users tax fund and requires the state treasurer to credit one-half of the amount of each doubled fine and surcharge to the account for the department to pay costs associated with the provision of educational outreach and public information about runaway truck events, the purchase and implementation of equipment for the purpose of reducing the frequency of runaway truck events, and the completion of studies of means by which the state may reduce the frequency of runaway truck events and improve overall commercial motor vehicle safety on state highways that pass through the state's mountains.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds and declares that:

4 (a) Trucks move the majority of the freight within our state, and
5 more than 75% of our communities' freight needs are served solely by
6 trucks;

7 (b) Due to Colorado's mountainous terrain, our state highways
8 traverse many mountain passes with steep downhill grades that result in
9 runaway truck incidents and truck fires associated with overheated
10 brakes;

11 (c) These incidents often result in serious injuries, substantial
12 property damage, and lane and road closures that create significant travel
13 delays;

14 (d) The majority of these incidents occur on or after sections of
15 highways with downhill grades of 5% or greater and are often associated
16 with truck drivers exceeding the posted, safe speed limits for those

1 corridors; and

2 (e) It is necessary to address these problems by increasing the
3 penalties and surcharges associated with speeding in these areas.

4 **SECTION 2.** In Colorado Revised Statutes, **add** 42-4-617 as
5 follows:

6 **42-4-617. Steep downhill grade zones - increase in penalties**
