between the division and the department of early childhood is required for the policies the division develops and adopts to implement the programs. Additionally, the division is required to submit an annual report regarding the programs to specified legislative committees and to the department of early childhood.

The child care facility development toolkit and technical assistance program is created to provide technical assistance from consultants and related professionals to enable interested child care providers, developers, employers, and local governments to understand the technical aspects of planning, developing, building, and co-locating child care facilities. The division must prioritize applications for projects that will meet a demonstrable need for child care in the areas of greatest need across the state and that satisfy one or more purposes of the program. The division is required to annually publish a report regarding the assistance provided under this program and the uses of such assistance by program recipients.

The child care facility development planning grant program is created to incentivize and support local governments in identifying and making regulatory updates or improvements to community planning, development, building, zoning, and other regulatory processes to support the development of child care facilities. The division must develop a menu of recommended policy or regulatory tools, and eligible recipients for the grant must intend to implement one or more of such tools off the menu or identify other local policies or programs to implement to streamline the eligible recipient's regulatory environment for the development of child care facilities. The division must publish a report that contains information regarding the amount of grants distributed and a description of recipients' use of the grants.

The child care facility development capital grant program is created to provide eligible entities, which are local governments or public-private partnerships, with money to construct, remodel, renovate, or retrofit a child care facility to meet a demonstrated need for child care in a local government's community. The state housing board within the division will be utilized by the division to review and make recommendations on grant applications. Grant recipients are required to provide a financial match. The financial match for center-based facilities is 50% and the financial match for home-based facilities is 25%. More weight is given to applications that represent geographic diversity, will serve a high percentage of families below the area's median income, commit to providing a well-compensated staff, co-locate with or repurpose facilities with other uses, plan to serve children in regions with low child care capacity, or plan to serve infants and toddlers. The division must publish a report that contains information regarding the amount of grants distributed and a description of recipients' use of the grants.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds and declares that:

4 (a) According to data compiled by "ReadyNation", the Colorado
5 economy loses approximately \$2.2 billion annually due to a severe
6 shortage of child care, and 51% of all Coloradans, and 53% of rural
7 Coloradans, live in a **licensed** child care desert;

8 (b) Colorado's economy relies on private child care businesses to
9 support the ability of parents to participate in the workforce, and these
10 businesses struggle to cover their costs while maintaining affordability for
11 parents;

12 (c) Policies and programs that can reduce the cost of facilities for
13 child care businesses by supporting the technical planning, building,
14 construction, and development aspects of child care facility creation will
15 allow the businesses to keep their doors open and to direct funds to other
16 critical areas such as increased wages for staff;

17 (d) Coloradans who seek to build, remodel, or renovate child care
18 facilities face many challenges, and reducing or removing these barriers
19 can help to increase child care capacity in the state;

20 (e) Incentivizing community-level regulatory alignment allows
21 local governments to lead in considering and meeting the unique needs
22 of their communities. Technical assistance and an incentive-based
23 partnership approach with local governments to streamline local
24 regulations have proven to be successful strategies for supporting
25 affordable housing with the affordable housing planning grant program
26 created in House Bill 21-1271;

27 (f) Technical assistance and capital support to increase child care

1 capacity has proven to be successful through the employer-based child
2 care facility grant and employer-based child care design lab programs
3 created in Senate Bill 21-236; and

4 (g) The division of housing within the department of local affairs
5 has experience in administering the programs created in House Bill
6 21-1271 and administering grant programs that require collaboration with
7 and among local governments, developers, and housing partners and is by
8 extension equipped to assist, facilitate, and provide expert assistance in
9 reviewing proposed projects and applications for grants to support the
10 development of child care facilities.
